

1 - Yêu Cầu :

- ✓ **Tải file ISO:** Truy cập trang web chính thức của bản phân phối bạn chọn và tải file ISO.
- ✓ Máy tính đã cài đặt VMware Workstation

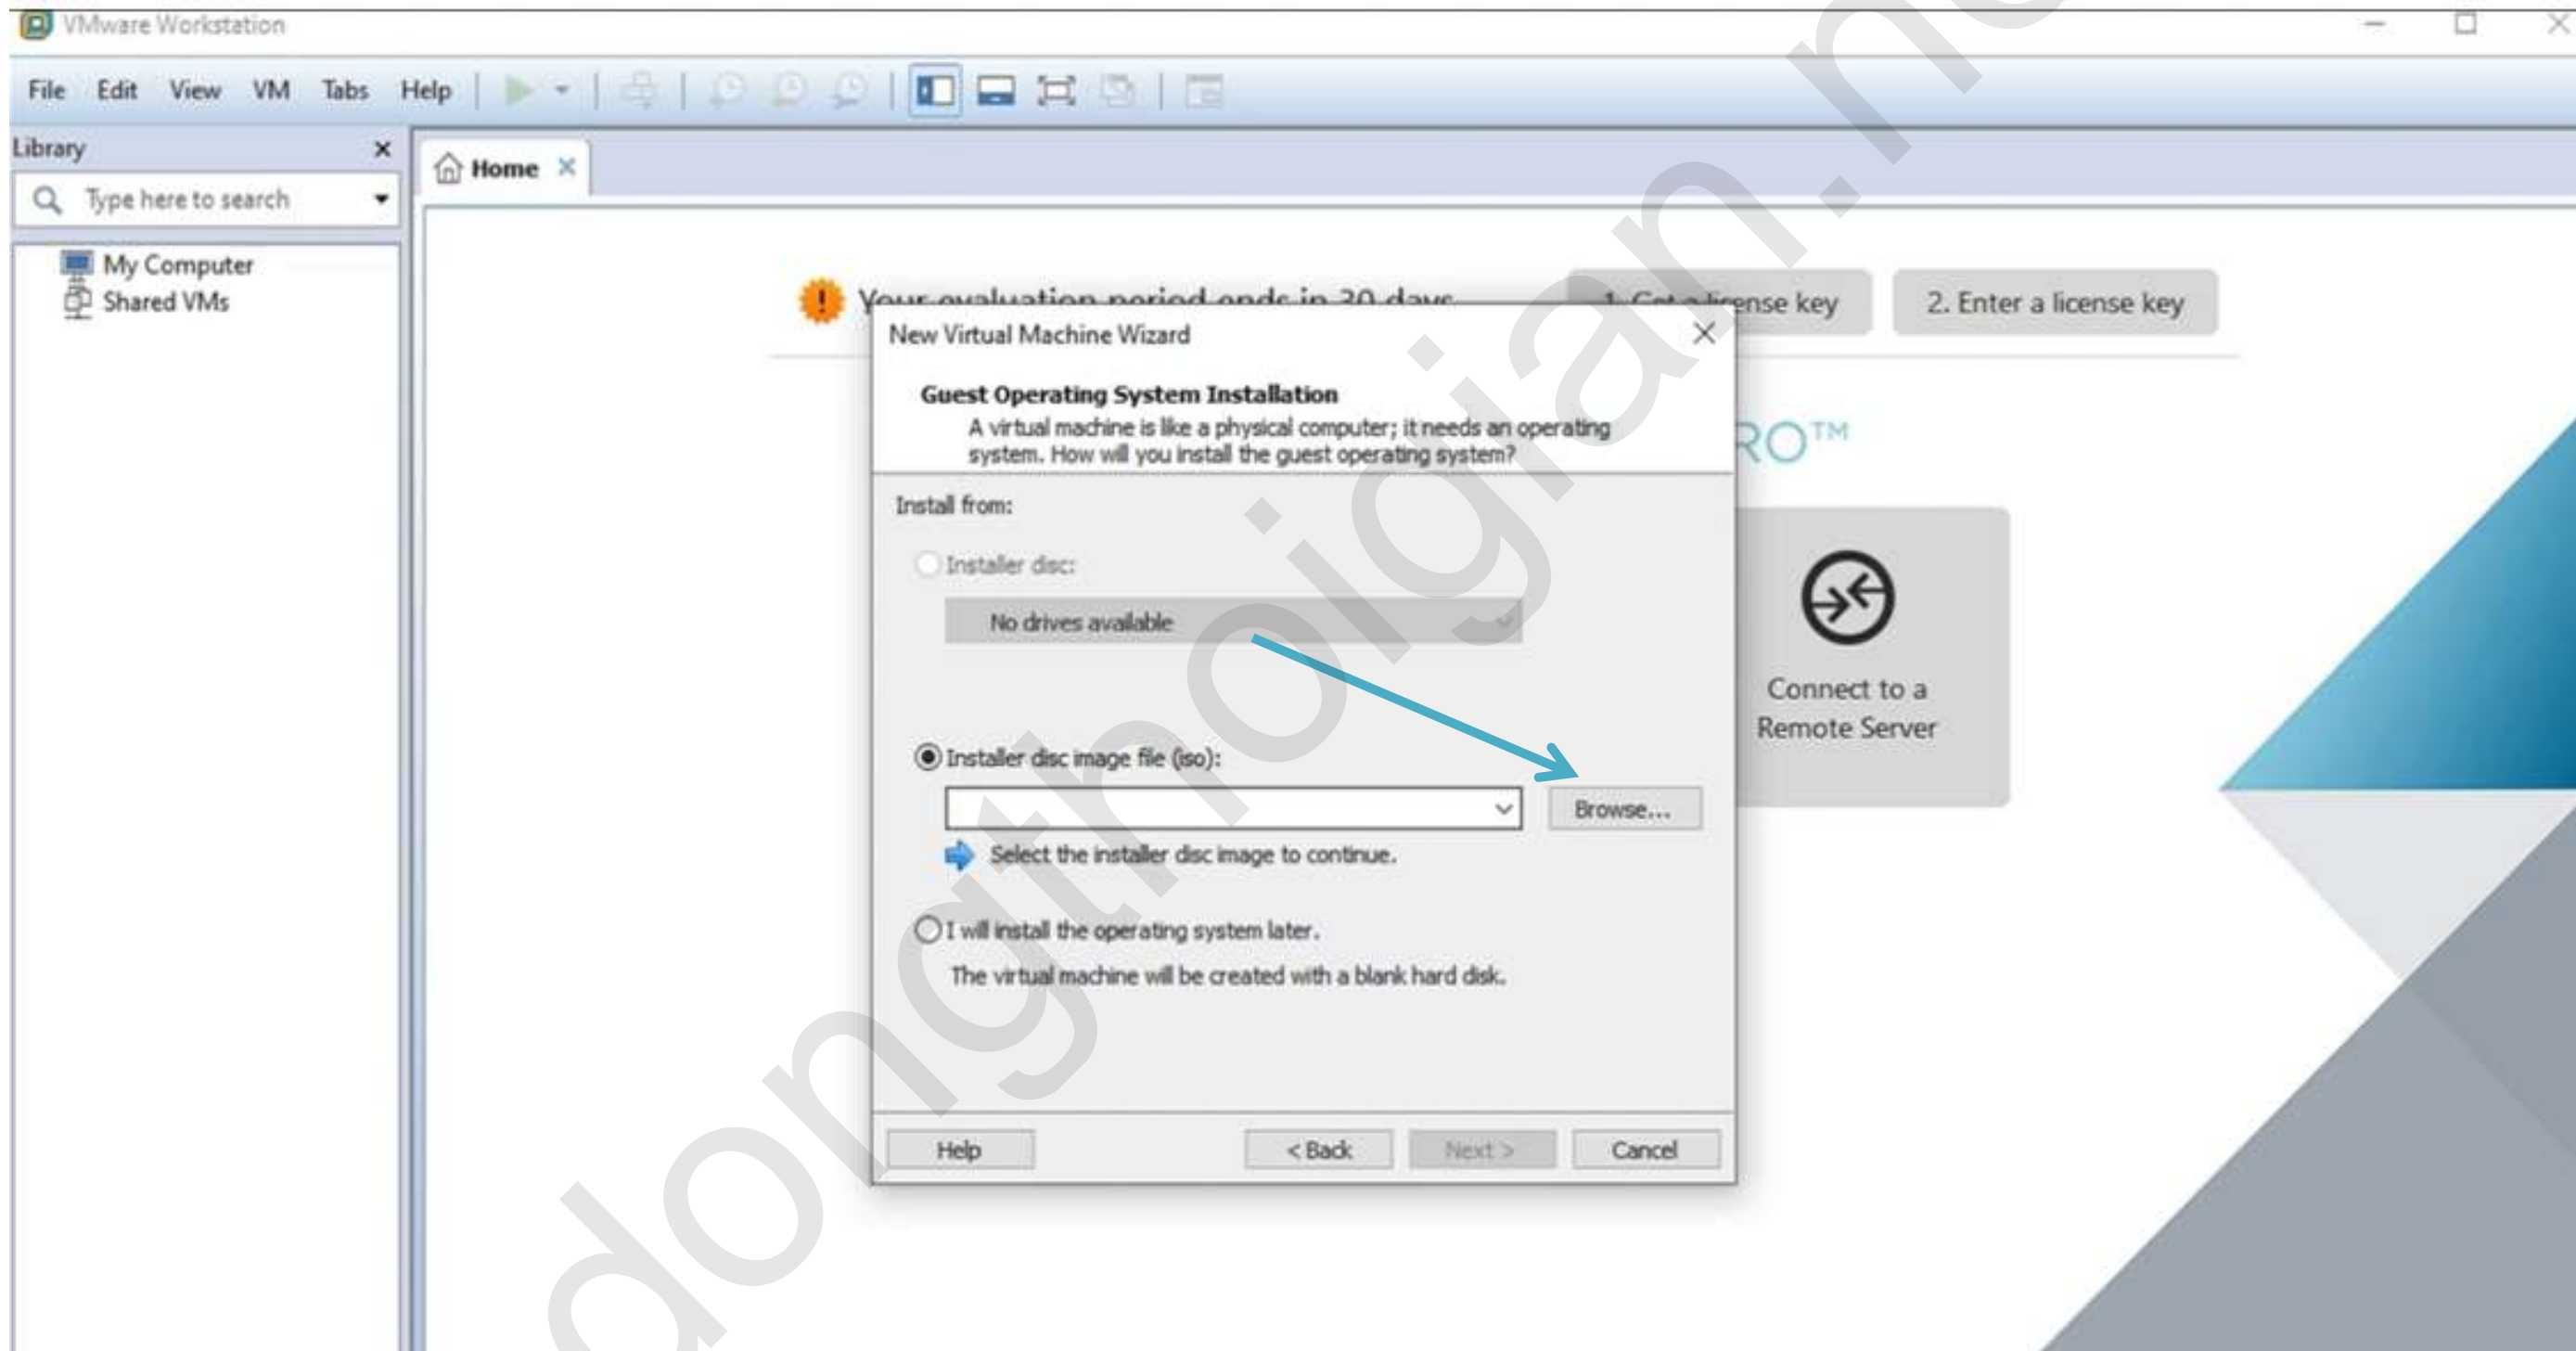

Step 1: Mở ứng dụng VMware Workstation

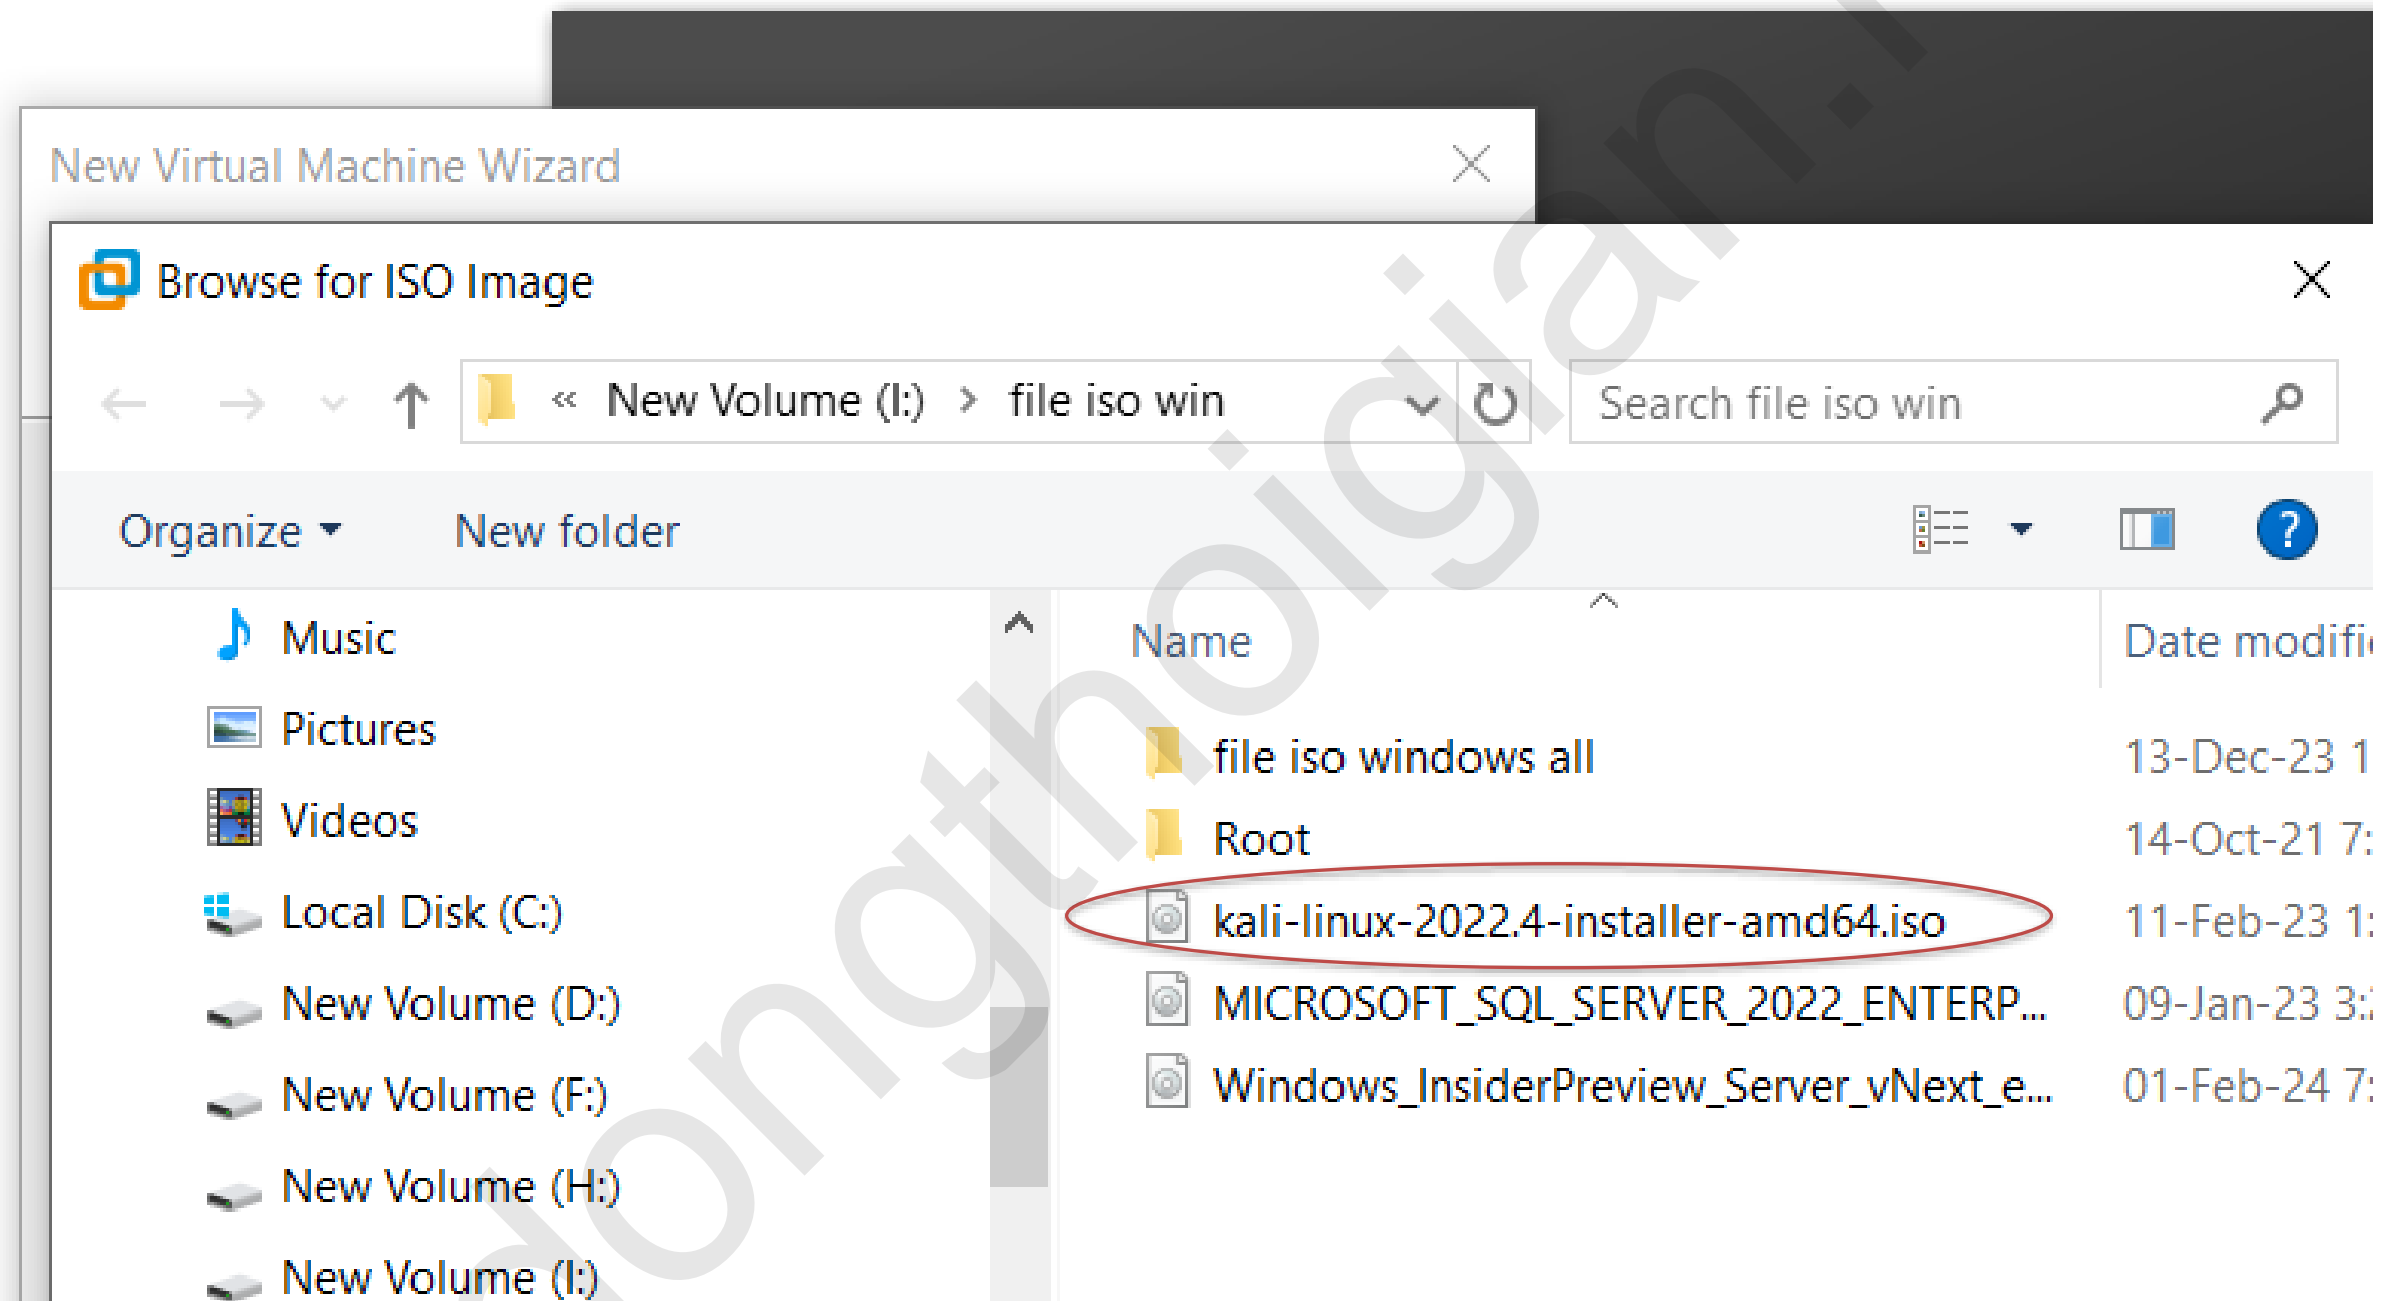

Step 2 : Click chọn Create a new virtual machine

Step 3 : Click Browse chọn file kali iso

Step 4 : Click chọn file iso kali linux

Step 5 : Click Next

New Virtual Machine Wizard ✕

Guest Operating System Installation
A virtual machine is like a physical computer; it needs an operating system. How will you install the guest operating system?

Install from:

Installer disc:
No drives available

Installer disc image file (iso):
I:\file iso win\kali-linux-2022.4-installer-amd64.iso Browse...

 Could not detect which operating system is in this disc image.
You will need to specify which operating system will be installed.

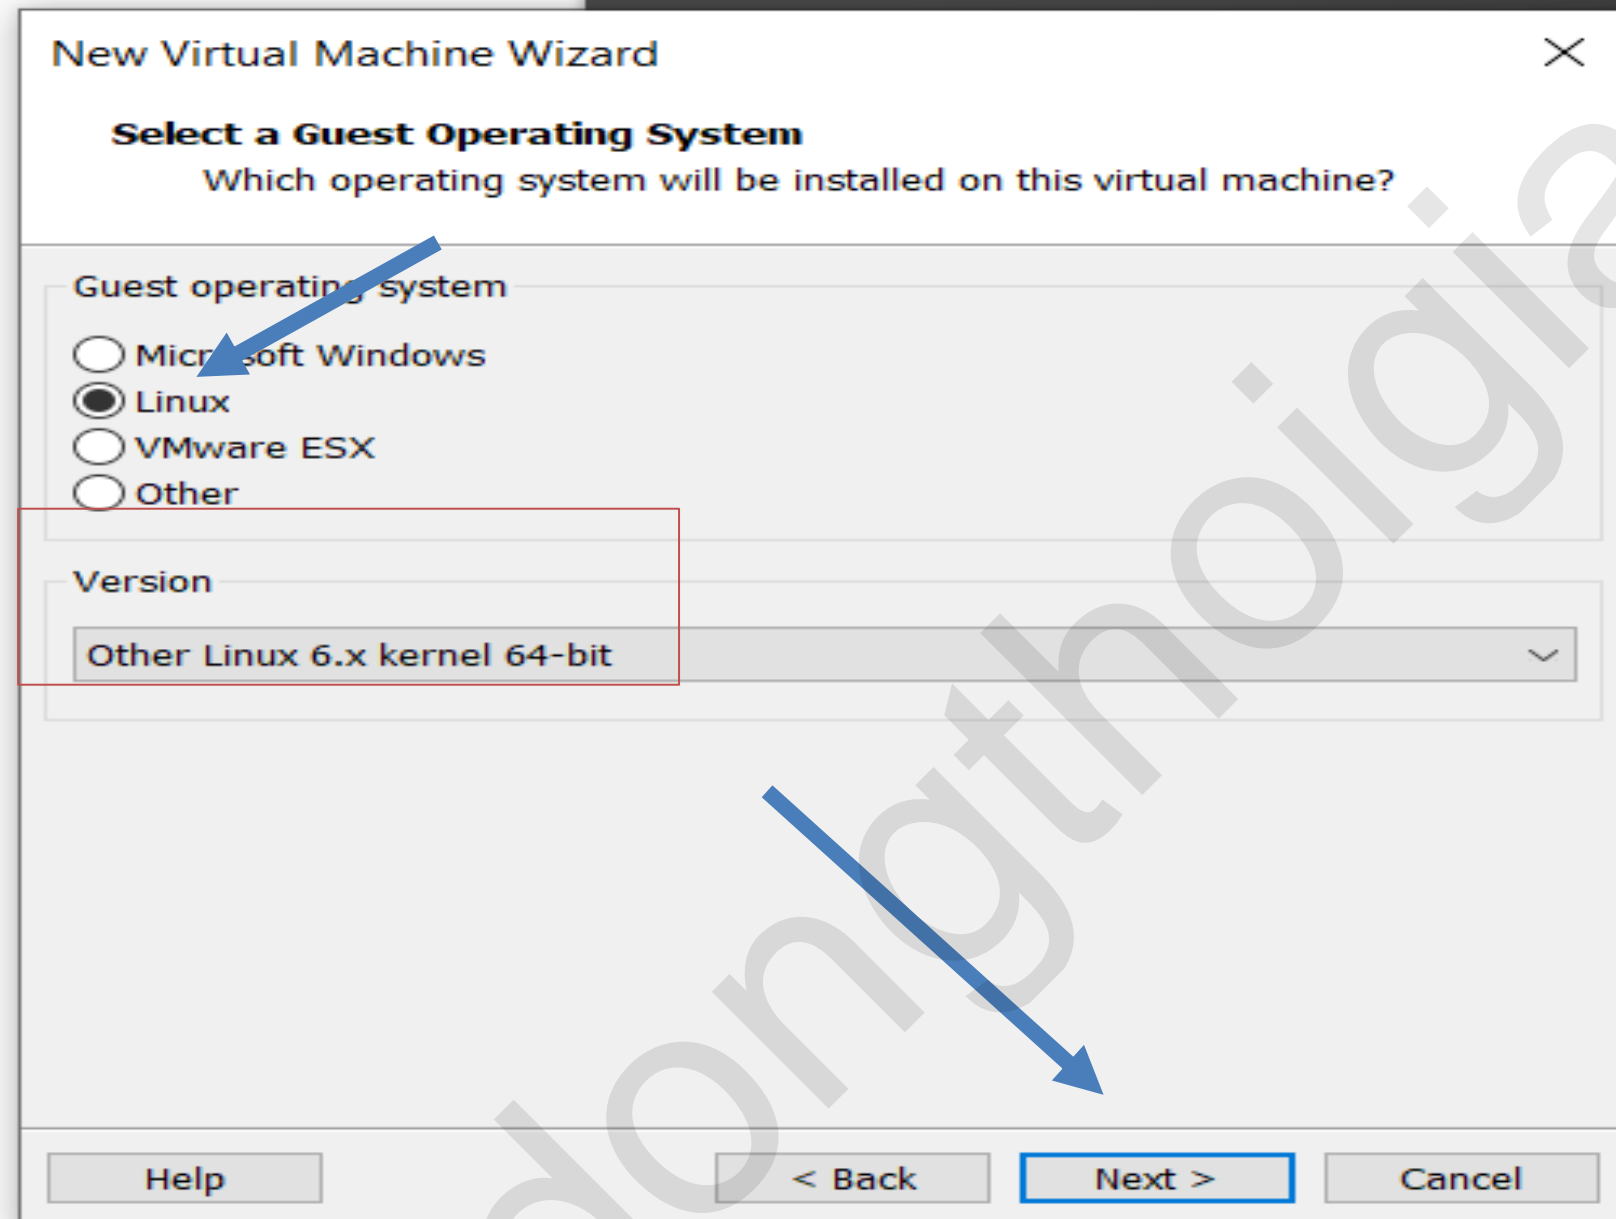

I will install the operating system later.
The virtual machine will be created with a blank hard disk.

Help < Back Next > Cancel

Step 6 :

- ✓ **Hệ điều hành (Guest operating system):** Chọn tab Linux
- ✓ **Phiên bản (Version):** chỉ định Other Linux 6.x kernel 64-bit
- ✓ Sau đó click Next

Step 7 :

- **Virtual machine name :** Đặt tên máy ảo
- **Localtion :** chọn thư mục lưu máy ảo. Sau đó, bạn chọn Next.

New Virtual Machine Wizard

Name the Virtual Machine
What name would you like to use for this virtual machine?

Virtual machine name:
Kali linux

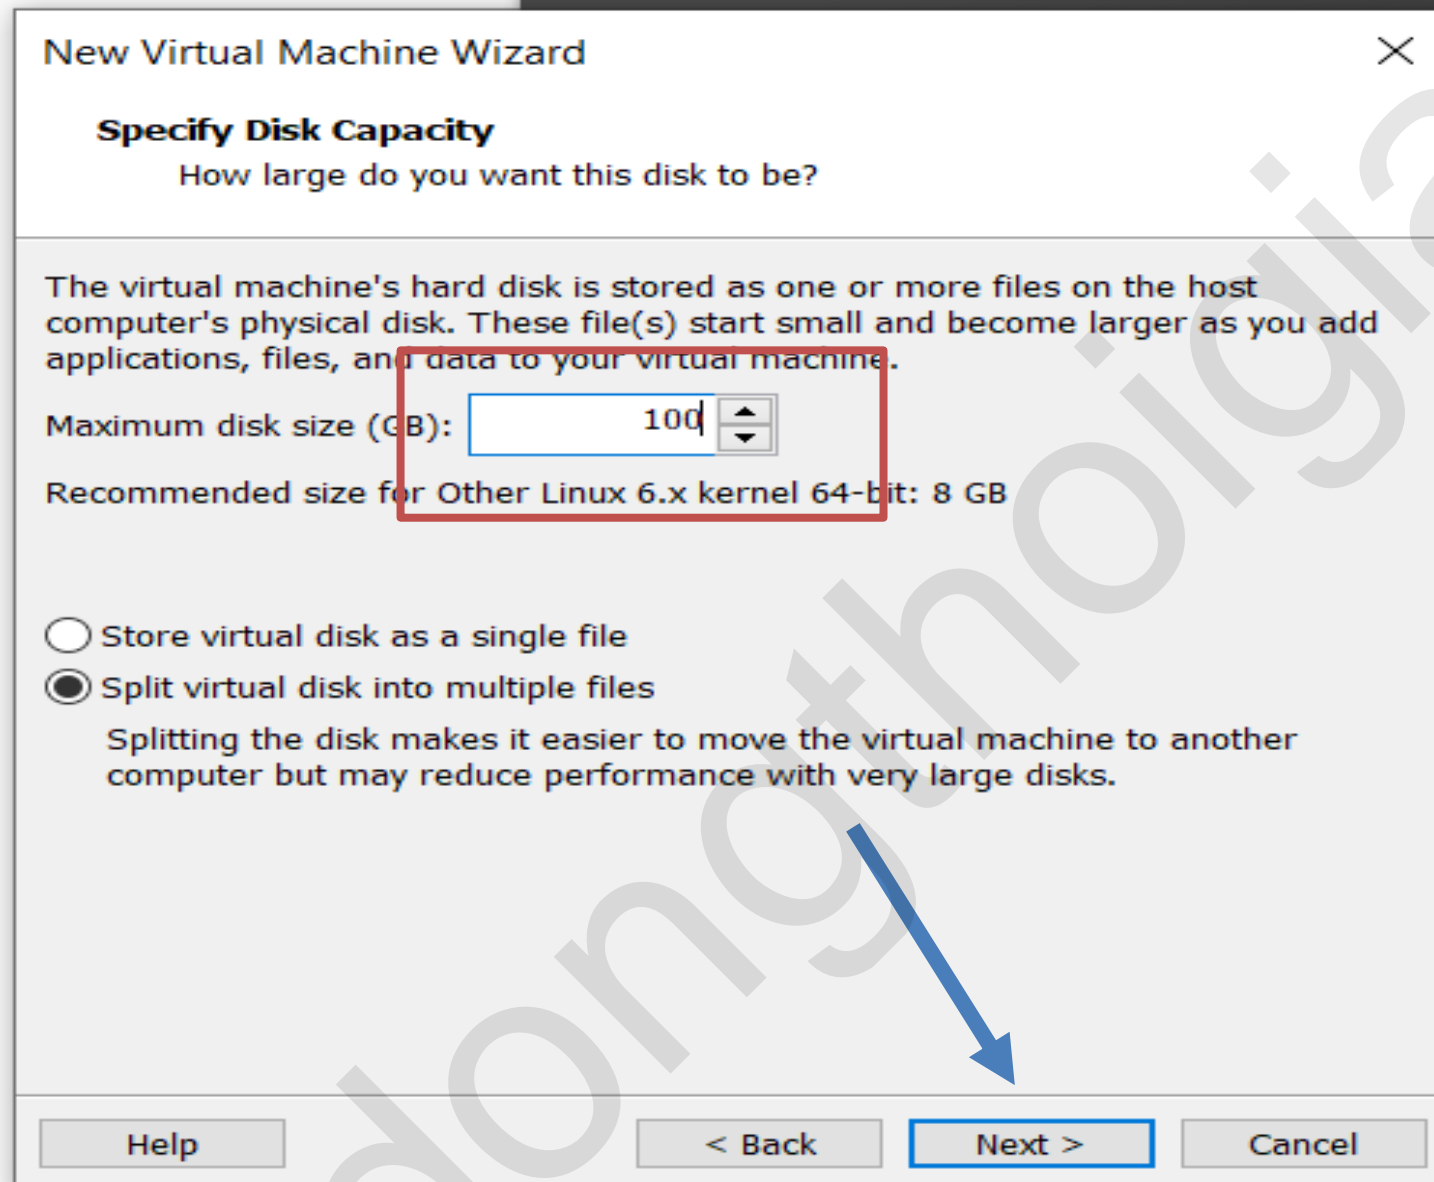

Location:
C:\Users\hhhhh\Documents\Virtual Machines\Kali linux

The default location can be changed at Edit > Preferences.

< Back Next > Cancel

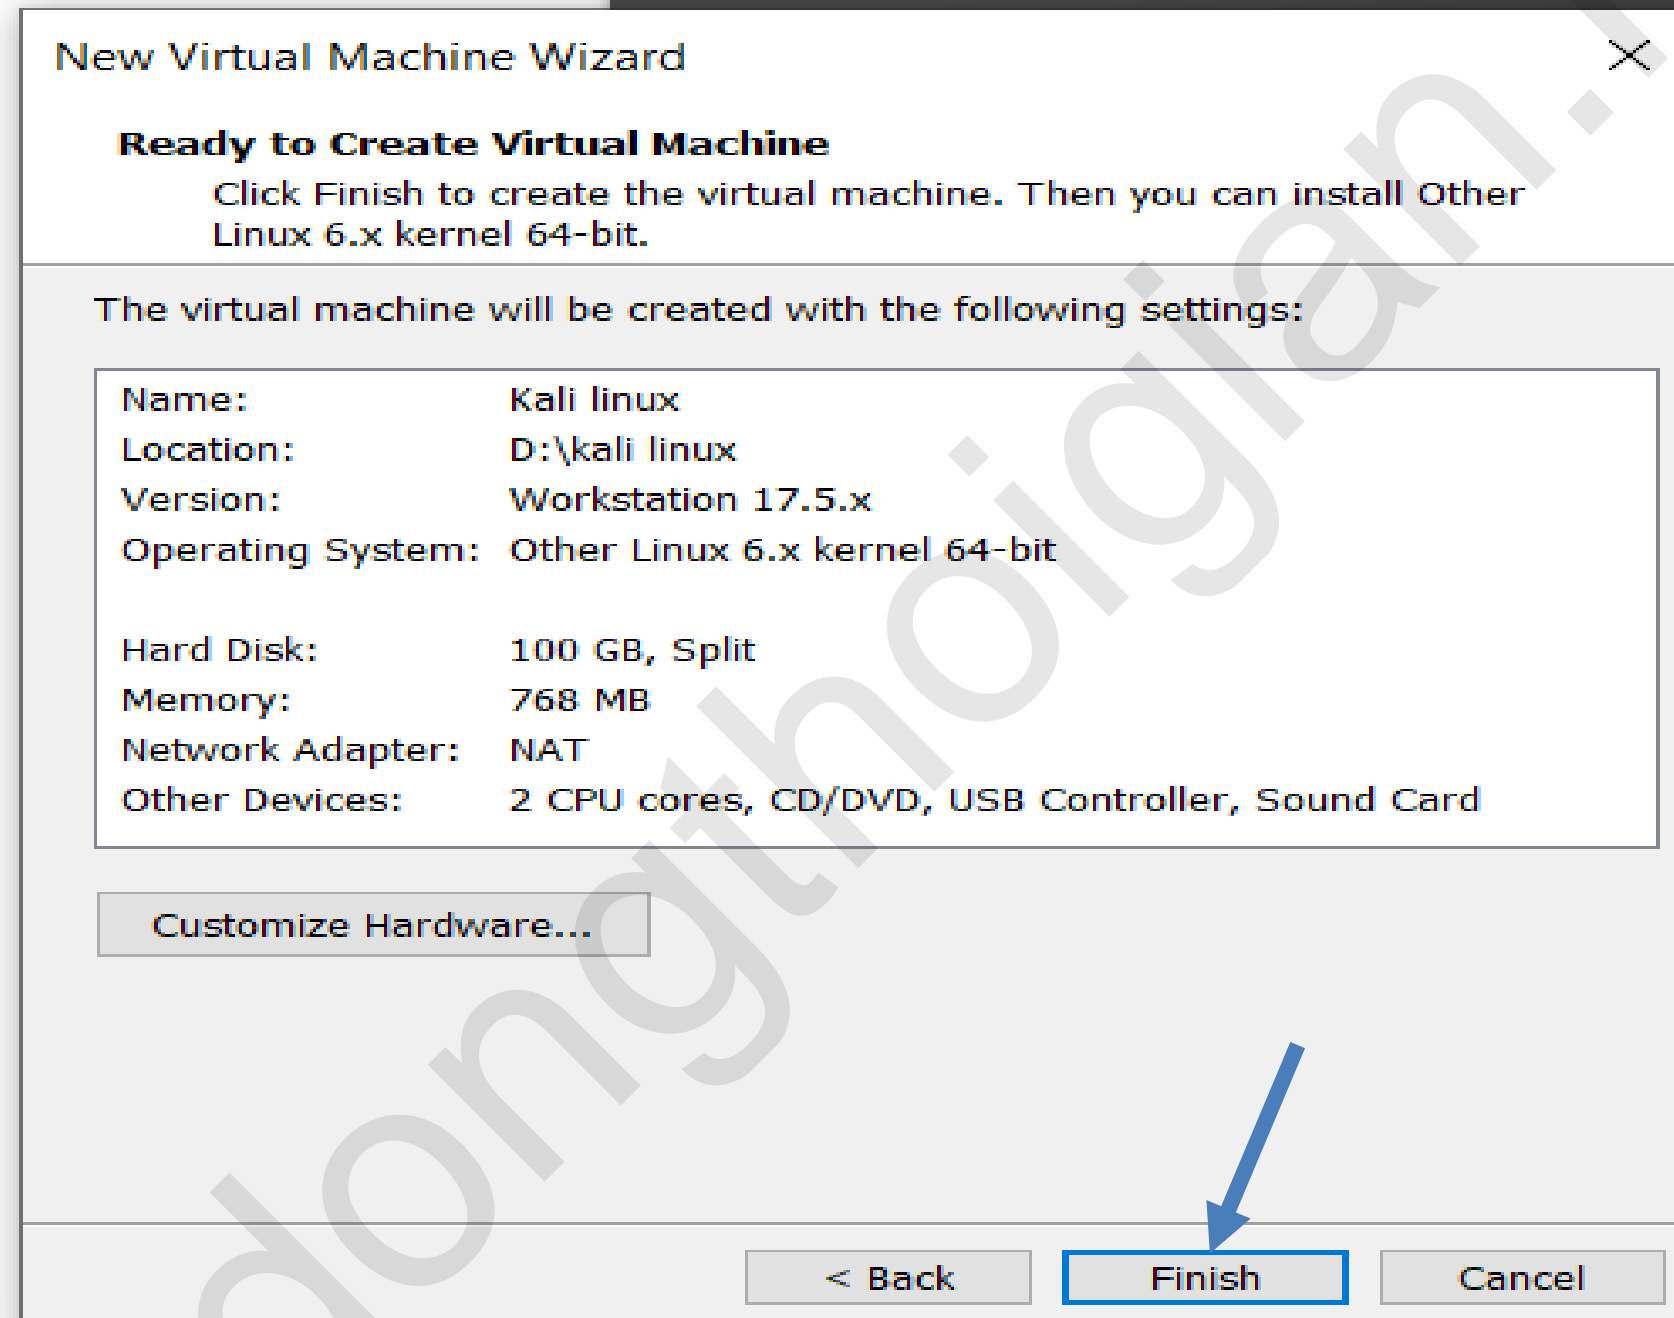

Step 8 :

- **Maximum disk size** : Định nghĩa dung lượng cho máy ảo VD : 100G
- Sau đó, bạn chọn Next

Step 9 :

- Click vào tab Finish

Step 10:

- **Memory** : định nghĩa dung lượng ram cho máy ảo
- **Processors** : định nghĩa nhân cpu máy ảo
- **Hard disk** : định nghĩa dung lượng máy ảo
- **CD/DVD** : chỉ định file iso cài máy ảo
- **Network adapter** : định nghĩa card mạng ảo
- **Usb controller** : chỉ định kết nối
- **Sound card** : âm thanh
- **Display** : Màn hình

The screenshot displays the 'Virtual Machine Settings' window for a Kali Linux virtual machine. The 'Hardware' tab is selected, showing a list of devices and their configurations. A red circle highlights the 'Memory' and 'Processors' settings in the hardware list. To the right, the 'Memory' section provides a detailed view of the memory allocation, including a slider and a legend for recommended memory values.

Virtual Machine Settings

Hardware Options

Device	Summary
Memory	768 MB
Processors	2
Hard Disk (SCSI)	100 GB
CD/DVD (IDE)	Using file I:\file iso win\kali-li...
Network Adapter	NAT
USB Controller	Present
Sound Card	Auto detect
Display	Auto detect

Memory

Specify the amount of memory allocated to this virtual machine. The memo size must be a multiple of 4 MB.

Memory for this virtual machine: MB

128 GB -
64 GB -
32 GB -
16 GB -
8 GB -
4 GB -
2 GB -
1 GB -
512 MB -
256 MB -
128 MB -
64 MB -
32 MB -
16 MB -
8 MB -
4 MB -

- Maximum recommended memc (Memory swapping may occur beyond this size.) 27.6 GB
- Recommended memory 768 MB
- Guest OS recommended minim 32 MB

Step 11:
Click vào Power on this virtual machine để cài đặt

Kali linux

▶ Power on this virtual machine
✎ Edit virtual machine settings

Sound Card	Auto detect
Display	Auto detect

▼ **Description**

Type here to enter a description of this virtual machine.

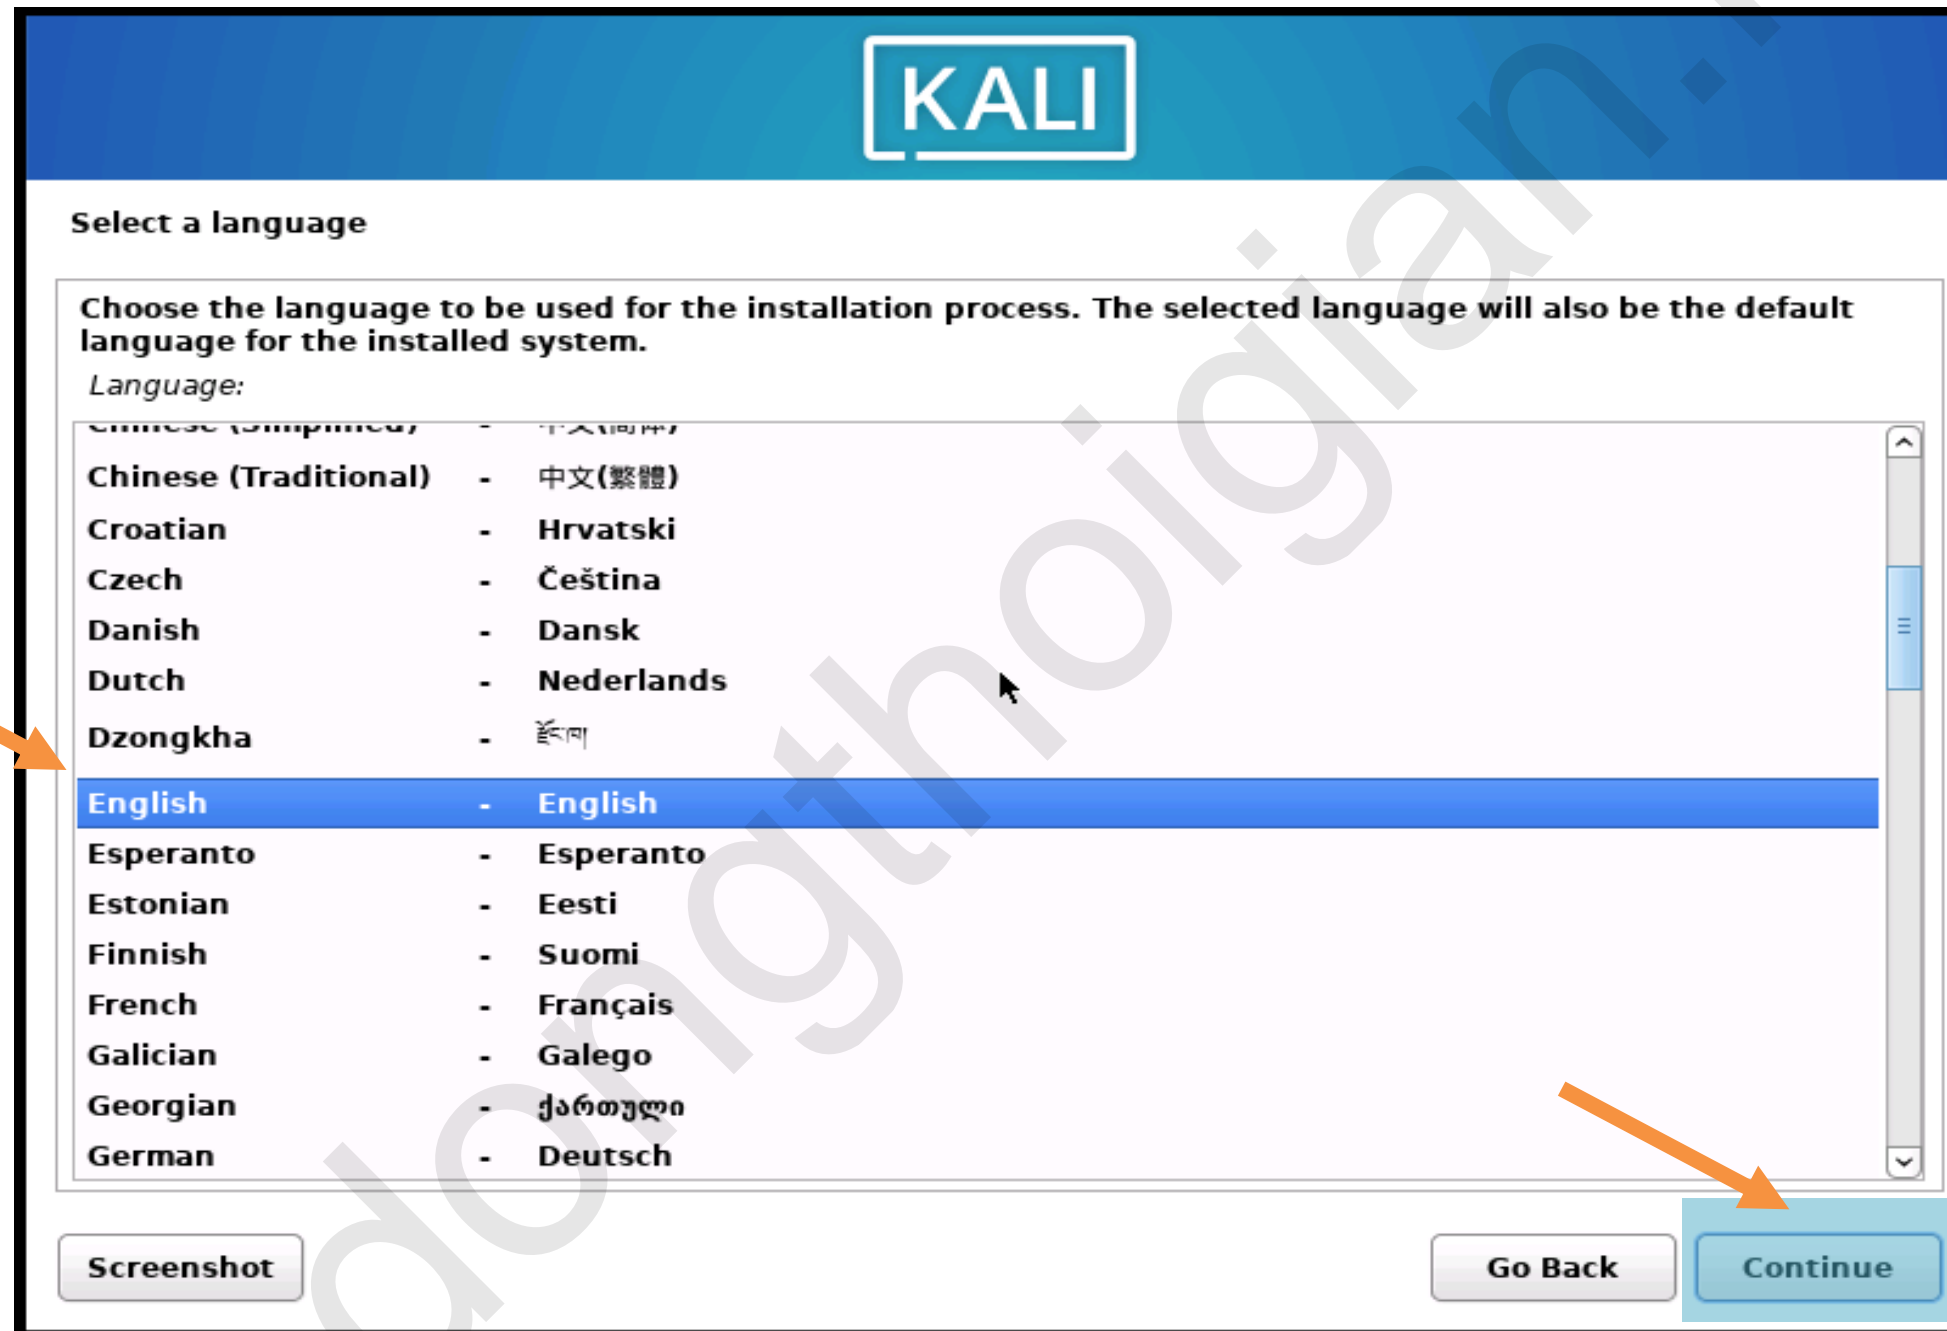

Step 12:

Chọn mục Graphical Install và ấn Enter.

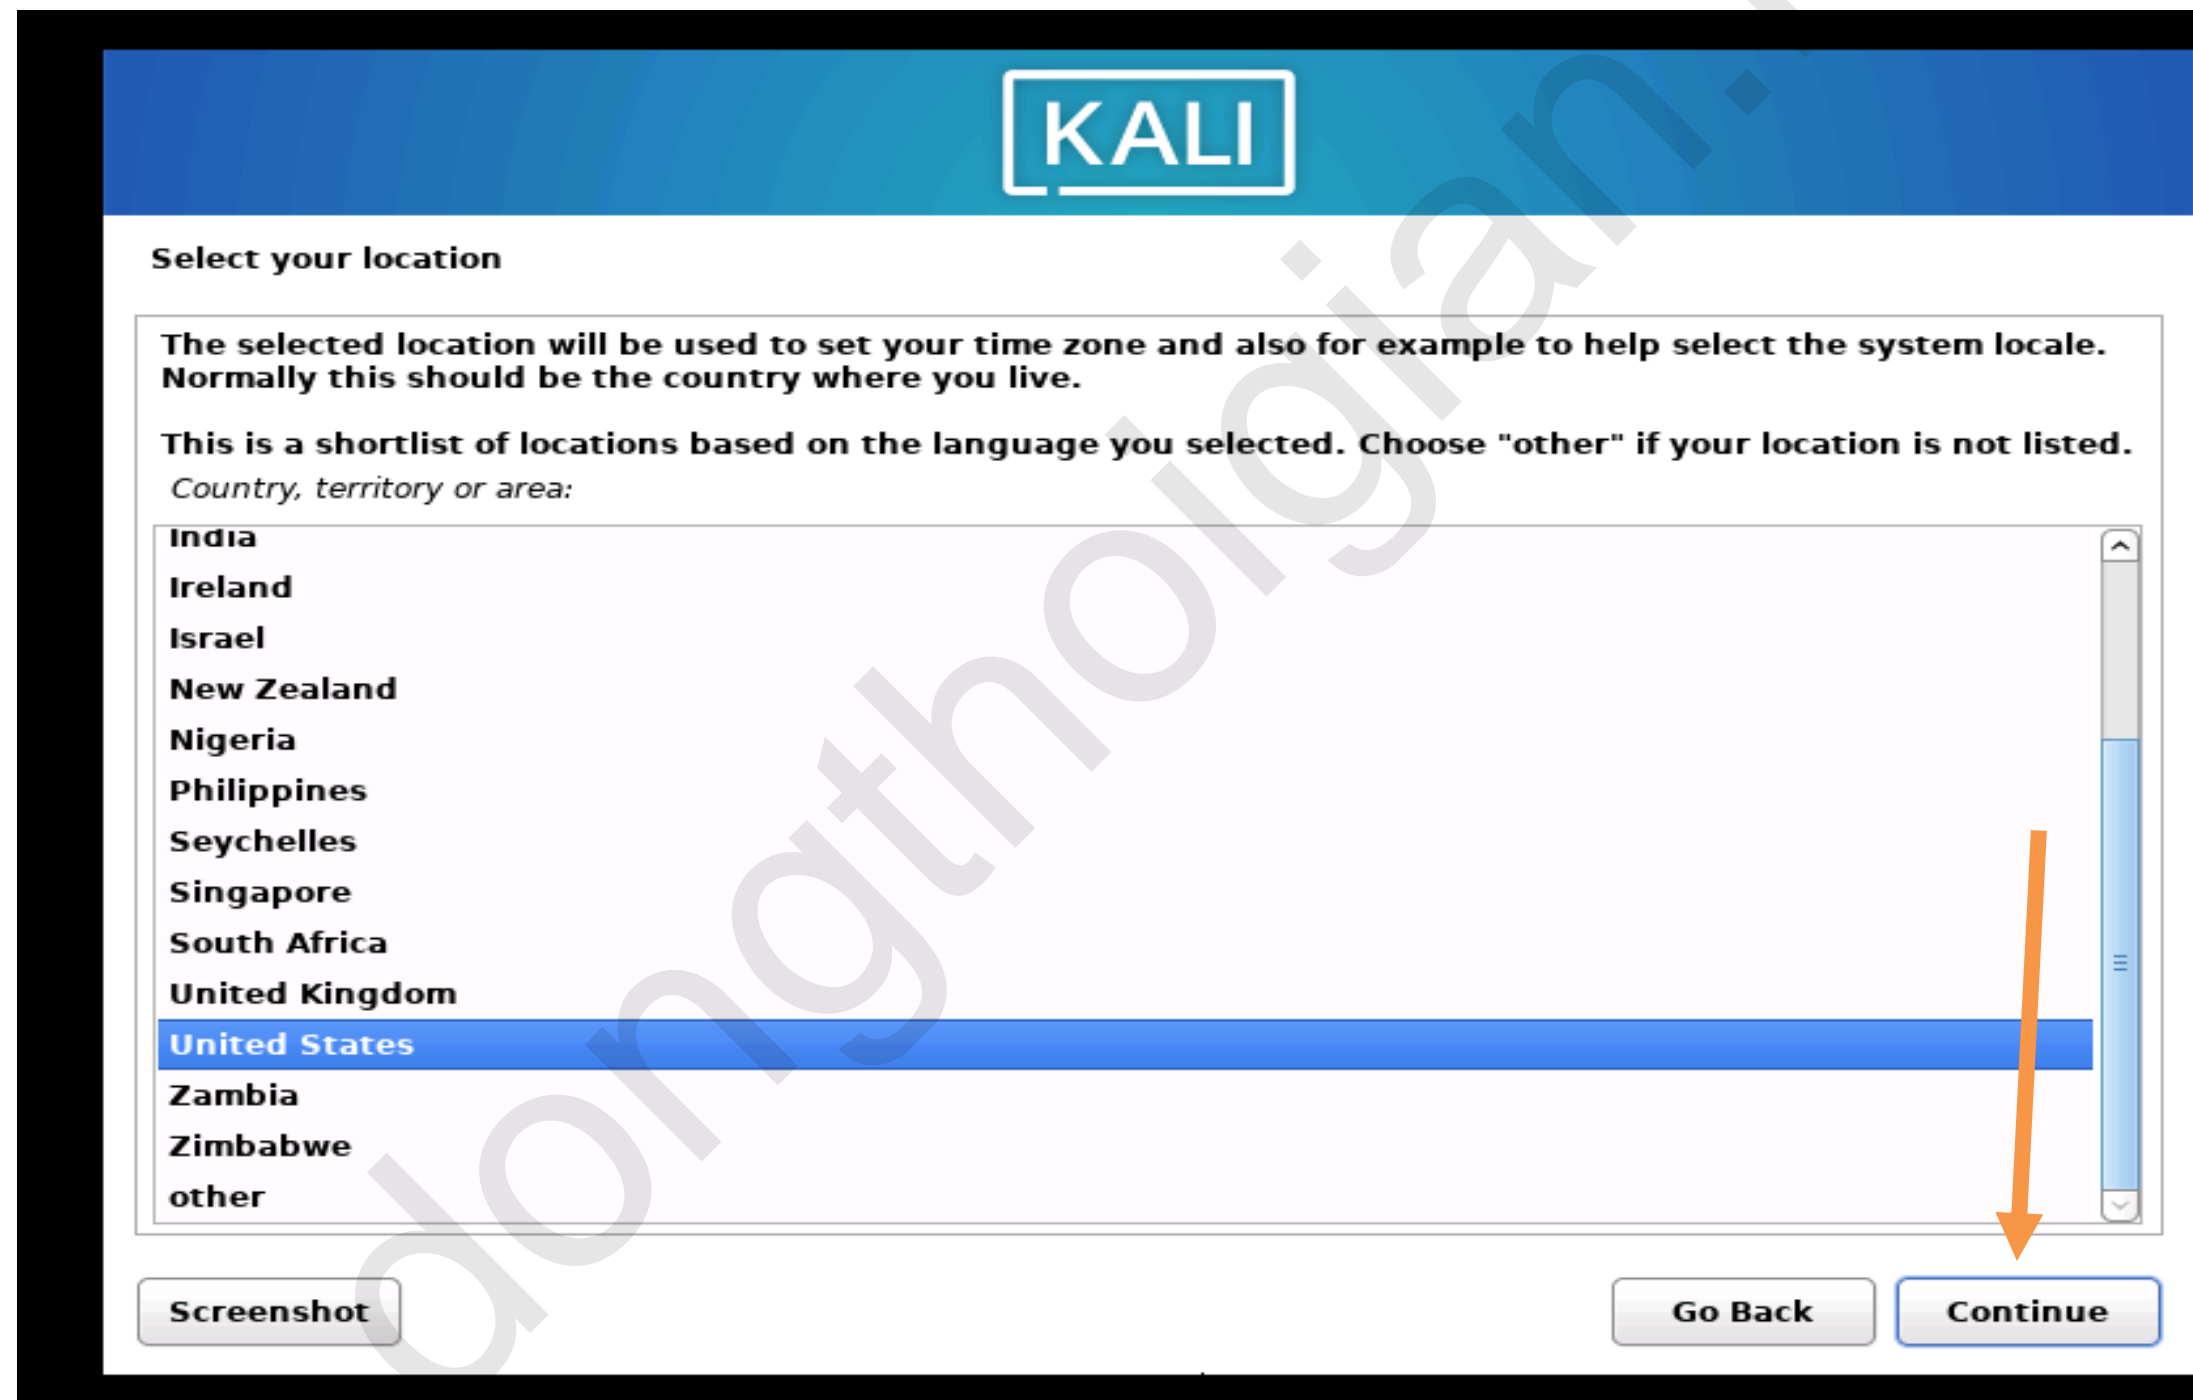

Step 13:

Chọn ngôn ngữ và bấm Continue

Step 14:

Chọn quốc gia, sau đó Click Continue.

KALI

Select your location

The selected location will be used to set your time zone and also for example to help select the system locale. Normally this should be the country where you live.

This is a shortlist of locations based on the language you selected. Choose "other" if your location is not listed.

Country, territory or area:

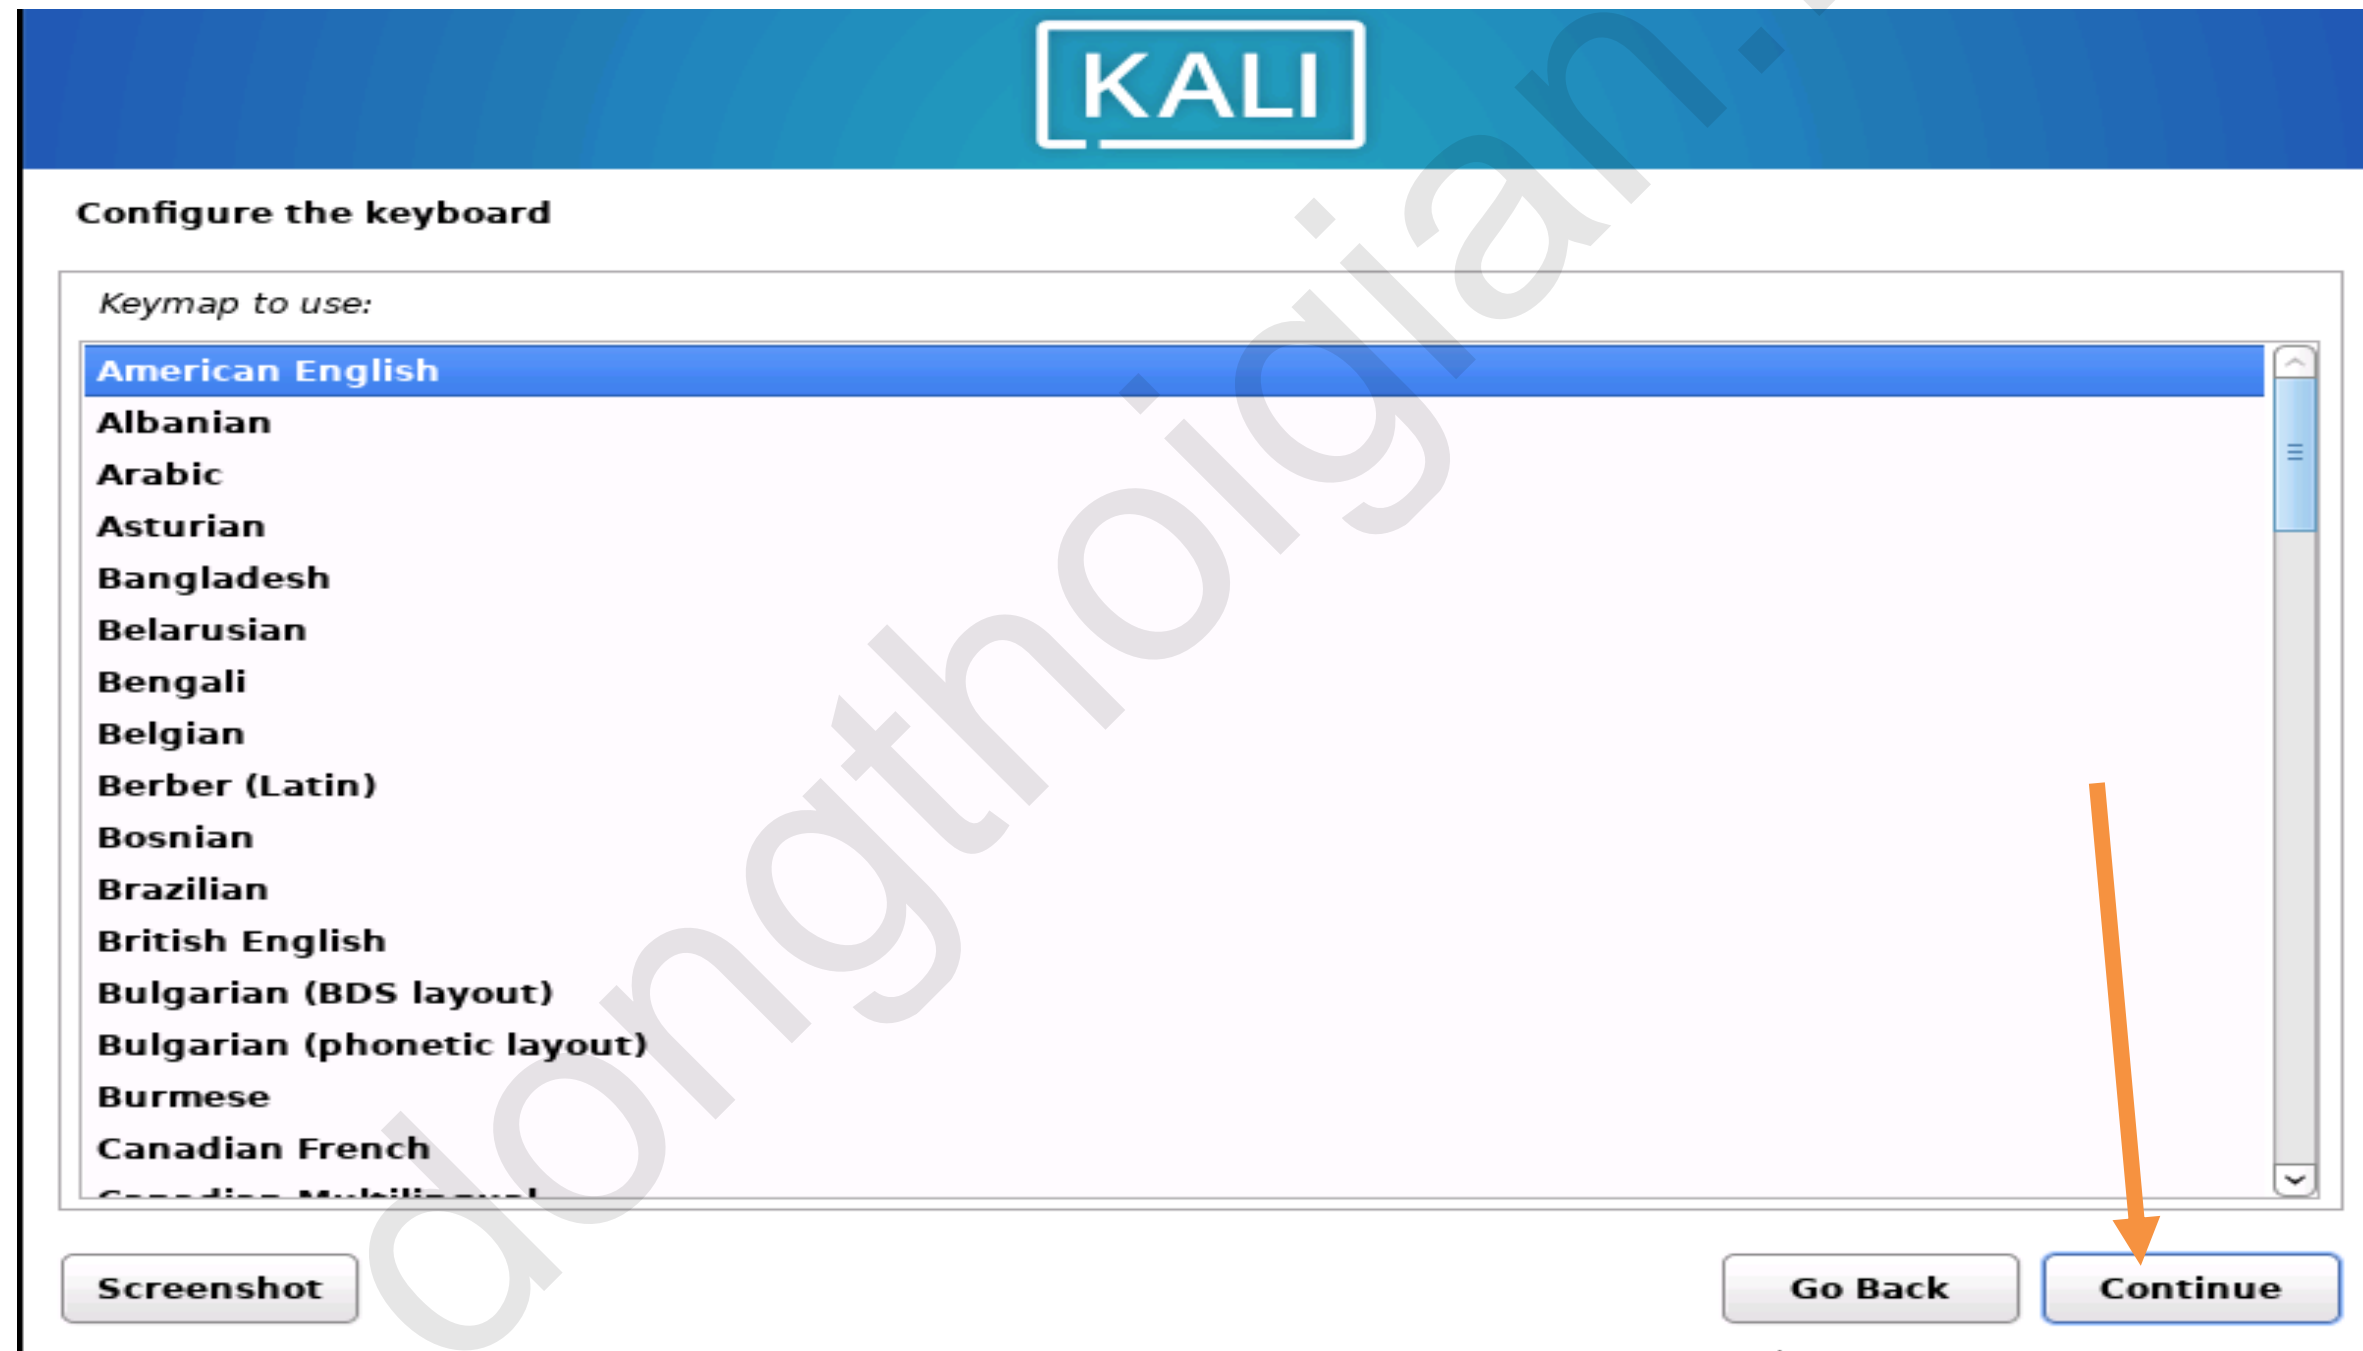

- India
- Ireland
- Israel
- New Zealand
- Nigeria
- Philippines
- Seychelles
- Singapore
- South Africa
- United Kingdom
- United States**
- Zambia
- Zimbabwe
- other

Step 15:

Tùy chọn giao diện bàn phím và tiếp tục click vào Continue.

Step 16:

Hostname : Đặt tên máy chủ và click chuột vào Continue

KALI

Configure the network

Please enter the hostname for this system.

The hostname is a single word that identifies your system to the network. If you don't know what your hostname should be, consult your network administrator. If you are setting up your own home network, you can make something up here.

Hostname:

kali

Go Back

Continue

Step 17:

Domain name : Chỉ Định tên miền máy chủ và click chuột vào Continue

KALI

Configure the network

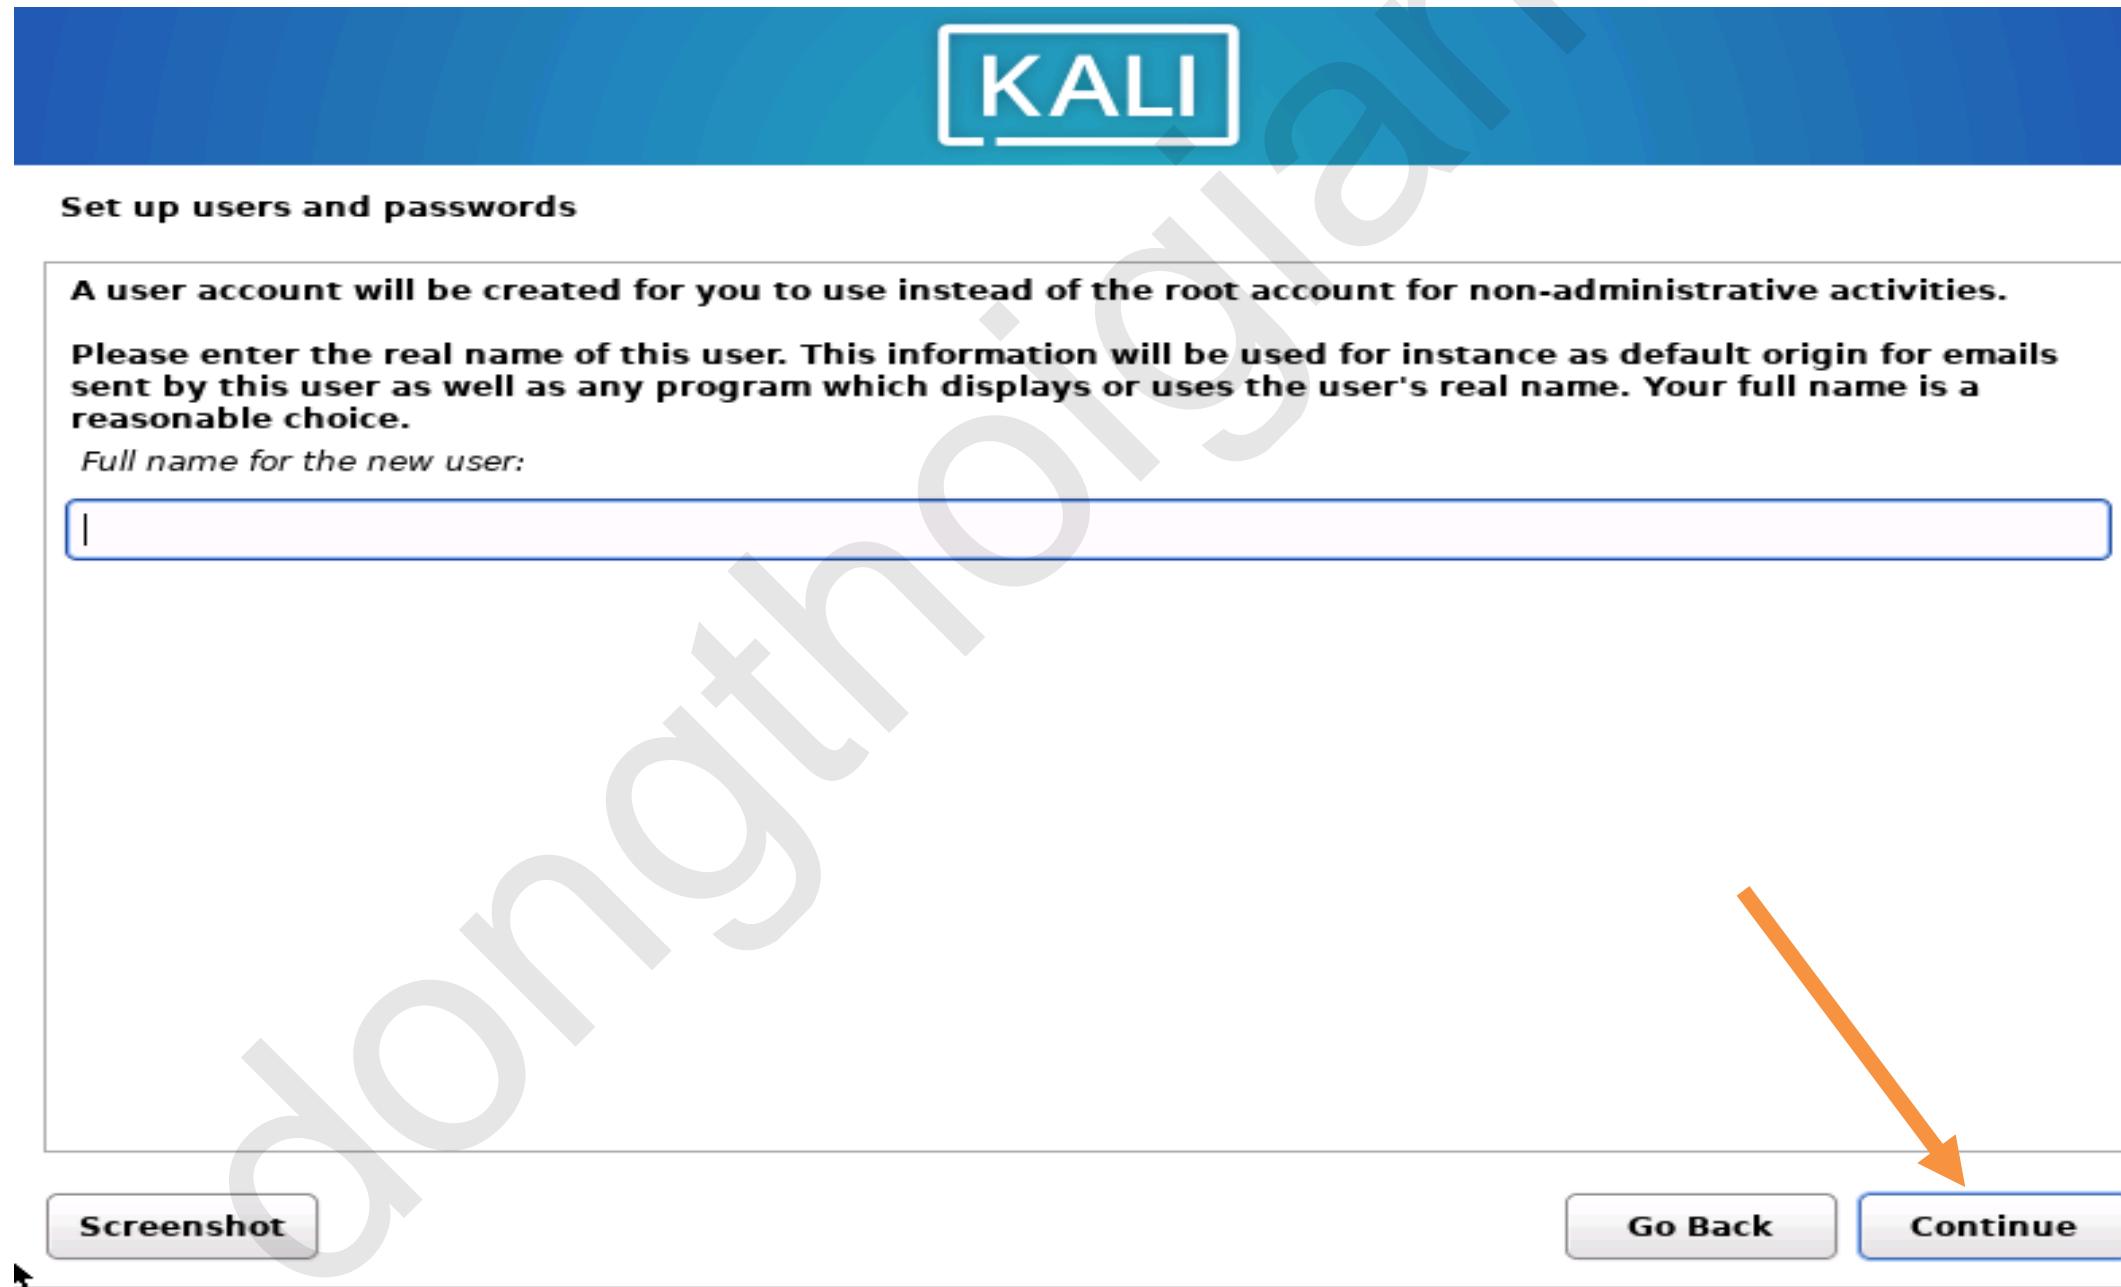

The domain name is the part of your Internet address to the right of your host name. It is often something that ends in .com, .net, .edu, or .org. If you are setting up a home network, you can make something up, but make sure you use the same domain name on all your computers.

Domain name:

[Screenshot](#) [Go Back](#) [Continue](#)

Step 18:

Full name for the new user : Đặt tên Thông tin người dùng đầy đủ . Sau đó click vào continue

KALI

Set up users and passwords

A user account will be created for you to use instead of the root account for non-administrative activities.

Please enter the real name of this user. This information will be used for instance as default origin for emails sent by this user as well as any program which displays or uses the user's real name. Your full name is a reasonable choice.

Full name for the new user:

Screenshot **Go Back** **Continue**

Step 19:

Username for your account : Tạo tài khoản người dung đăng nhập
Sau đó click vào continue

Set up users and passwords

Select a username for the new account. Your first name is a reasonable choice. The username should start with a lower-case letter, which can be followed by any combination of numbers and more lower-case letters.

Username for your account:

[Screenshot](#) [Go Back](#) [Continue](#)

Step 20:

- Choose a password for the new user : Tạo mật khẩu người dung
- Re- enter password to verify : Nhập lại mật khẩu
- Sau đó click vào Continue

KALI

Set up users and passwords

A good password will contain a mixture of letters, numbers and punctuation and should be changed at regular intervals.
Choose a password for the new user:

●●●●●●●●

Show Password in Clear

Please enter the same user password again to verify you have typed it correctly.
Re-enter password to verify:

●●●●●●●●

Show Password in Clear

Undo changes to partitions

Finish partitioning and write changes to disk

Screenshot **Help** **Go Back** **Continue**

Step 29:

Chọn Tab Yes để ghi lưu lại các thay đổi vào phân vùng ổ cứng.
Sau đó click continue

Step 30:

Chọn các phần mềm cài đặt, thao tác này cần kết nối internet.
Sau đó click vào Continue

Software selection

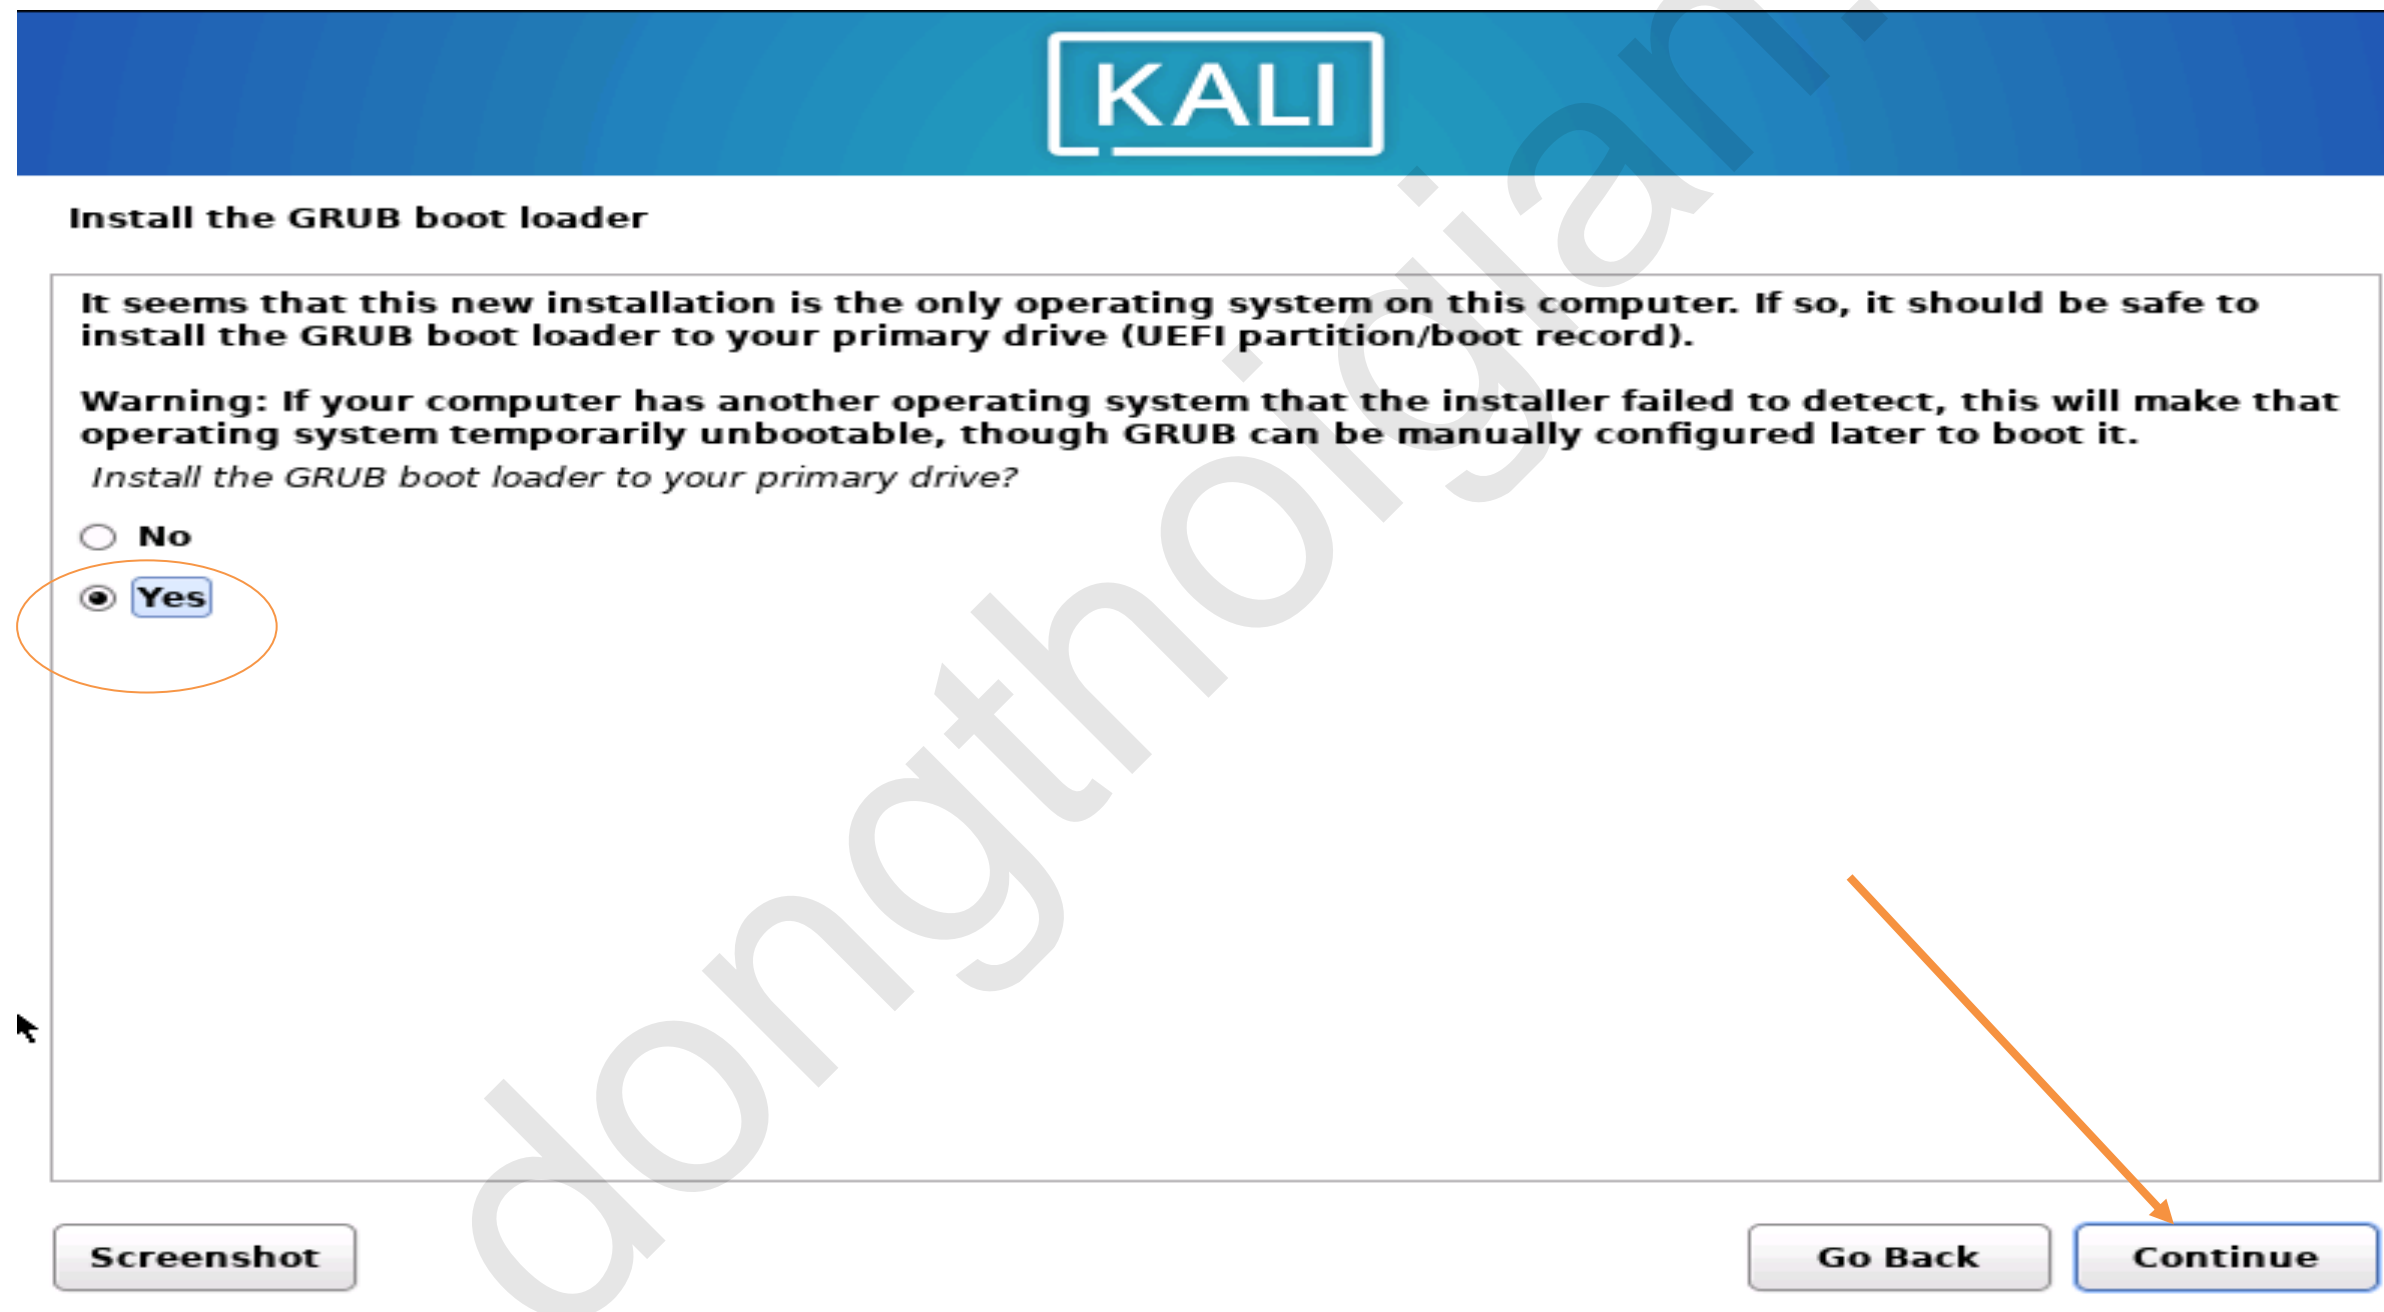

At the moment, only the core of the system is installed. The default selections below will install Kali Linux with its standard desktop environment and the default tools.

You can customize it by choosing a different desktop environment or a different collection of tools.
Choose software to install:

- Desktop environment [selecting this item has no effect]
- ... Xfce (Kali's default desktop environment)
- ... GNOME
- ... KDE Plasma
- Collection of tools [selecting this item has no effect]
- ... top10 -- the 10 most popular tools
- ... default -- recommended tools (available in the live system)

Step 31:

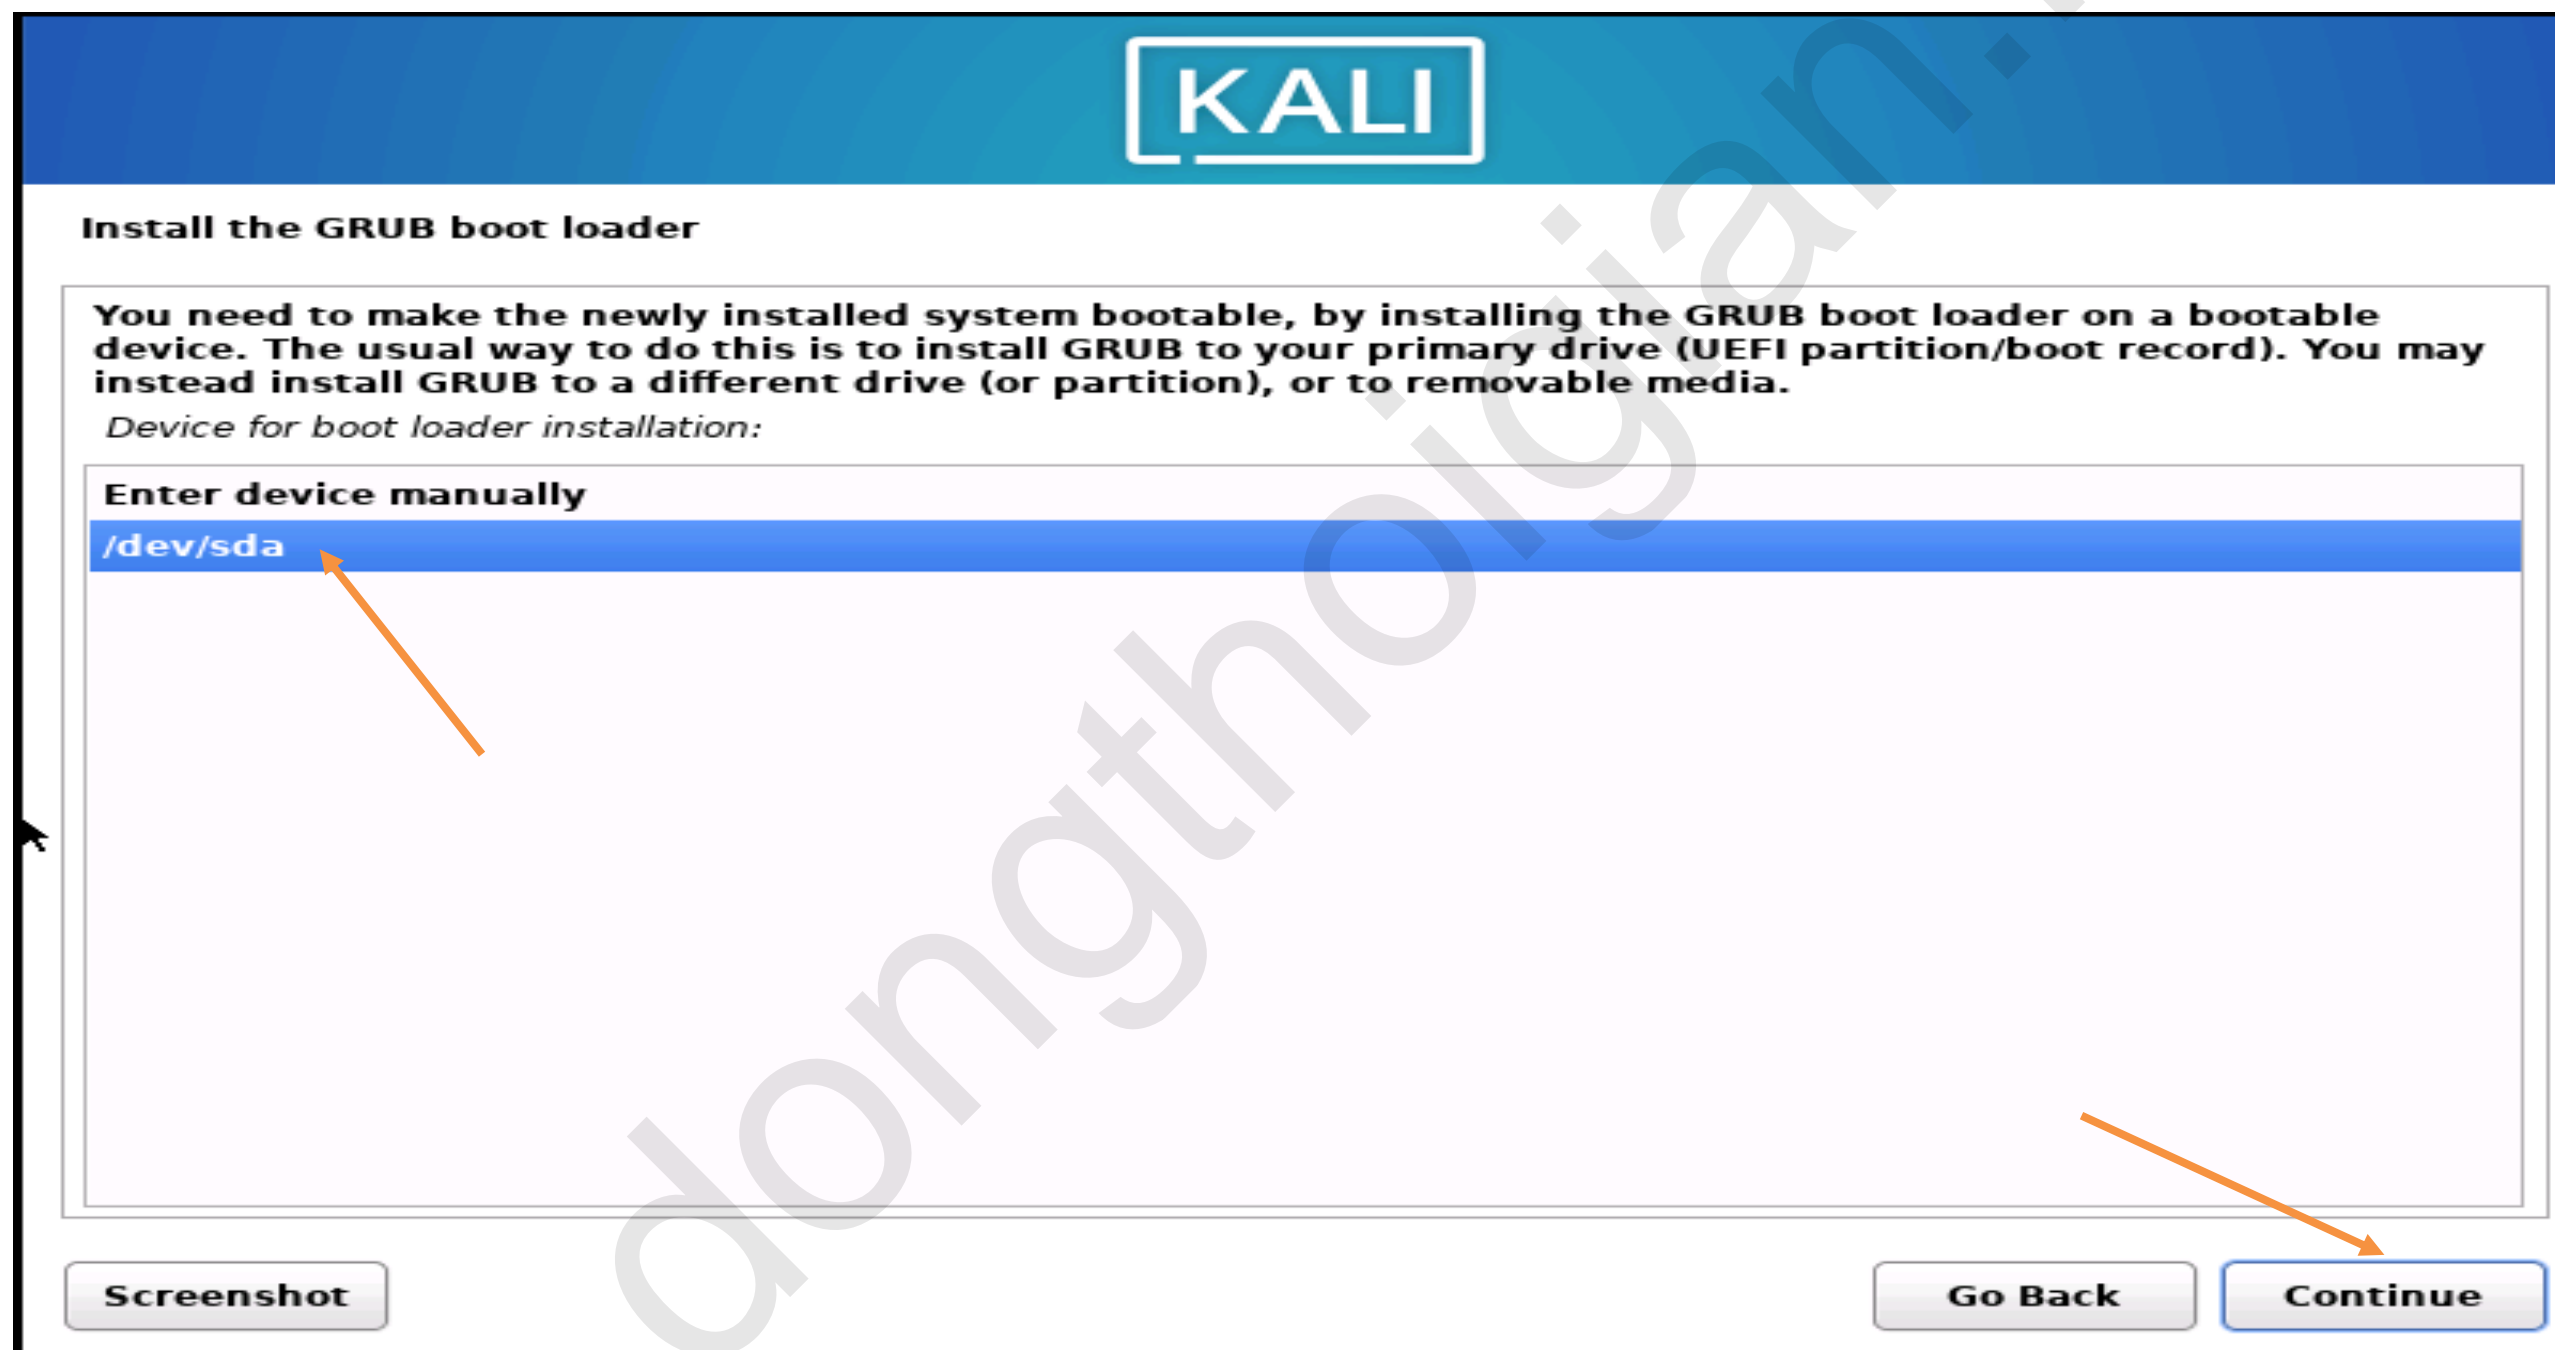

Install the Grub boot load to your primary drive : chọn tab Yes
Sau đó click continue

Step 32:

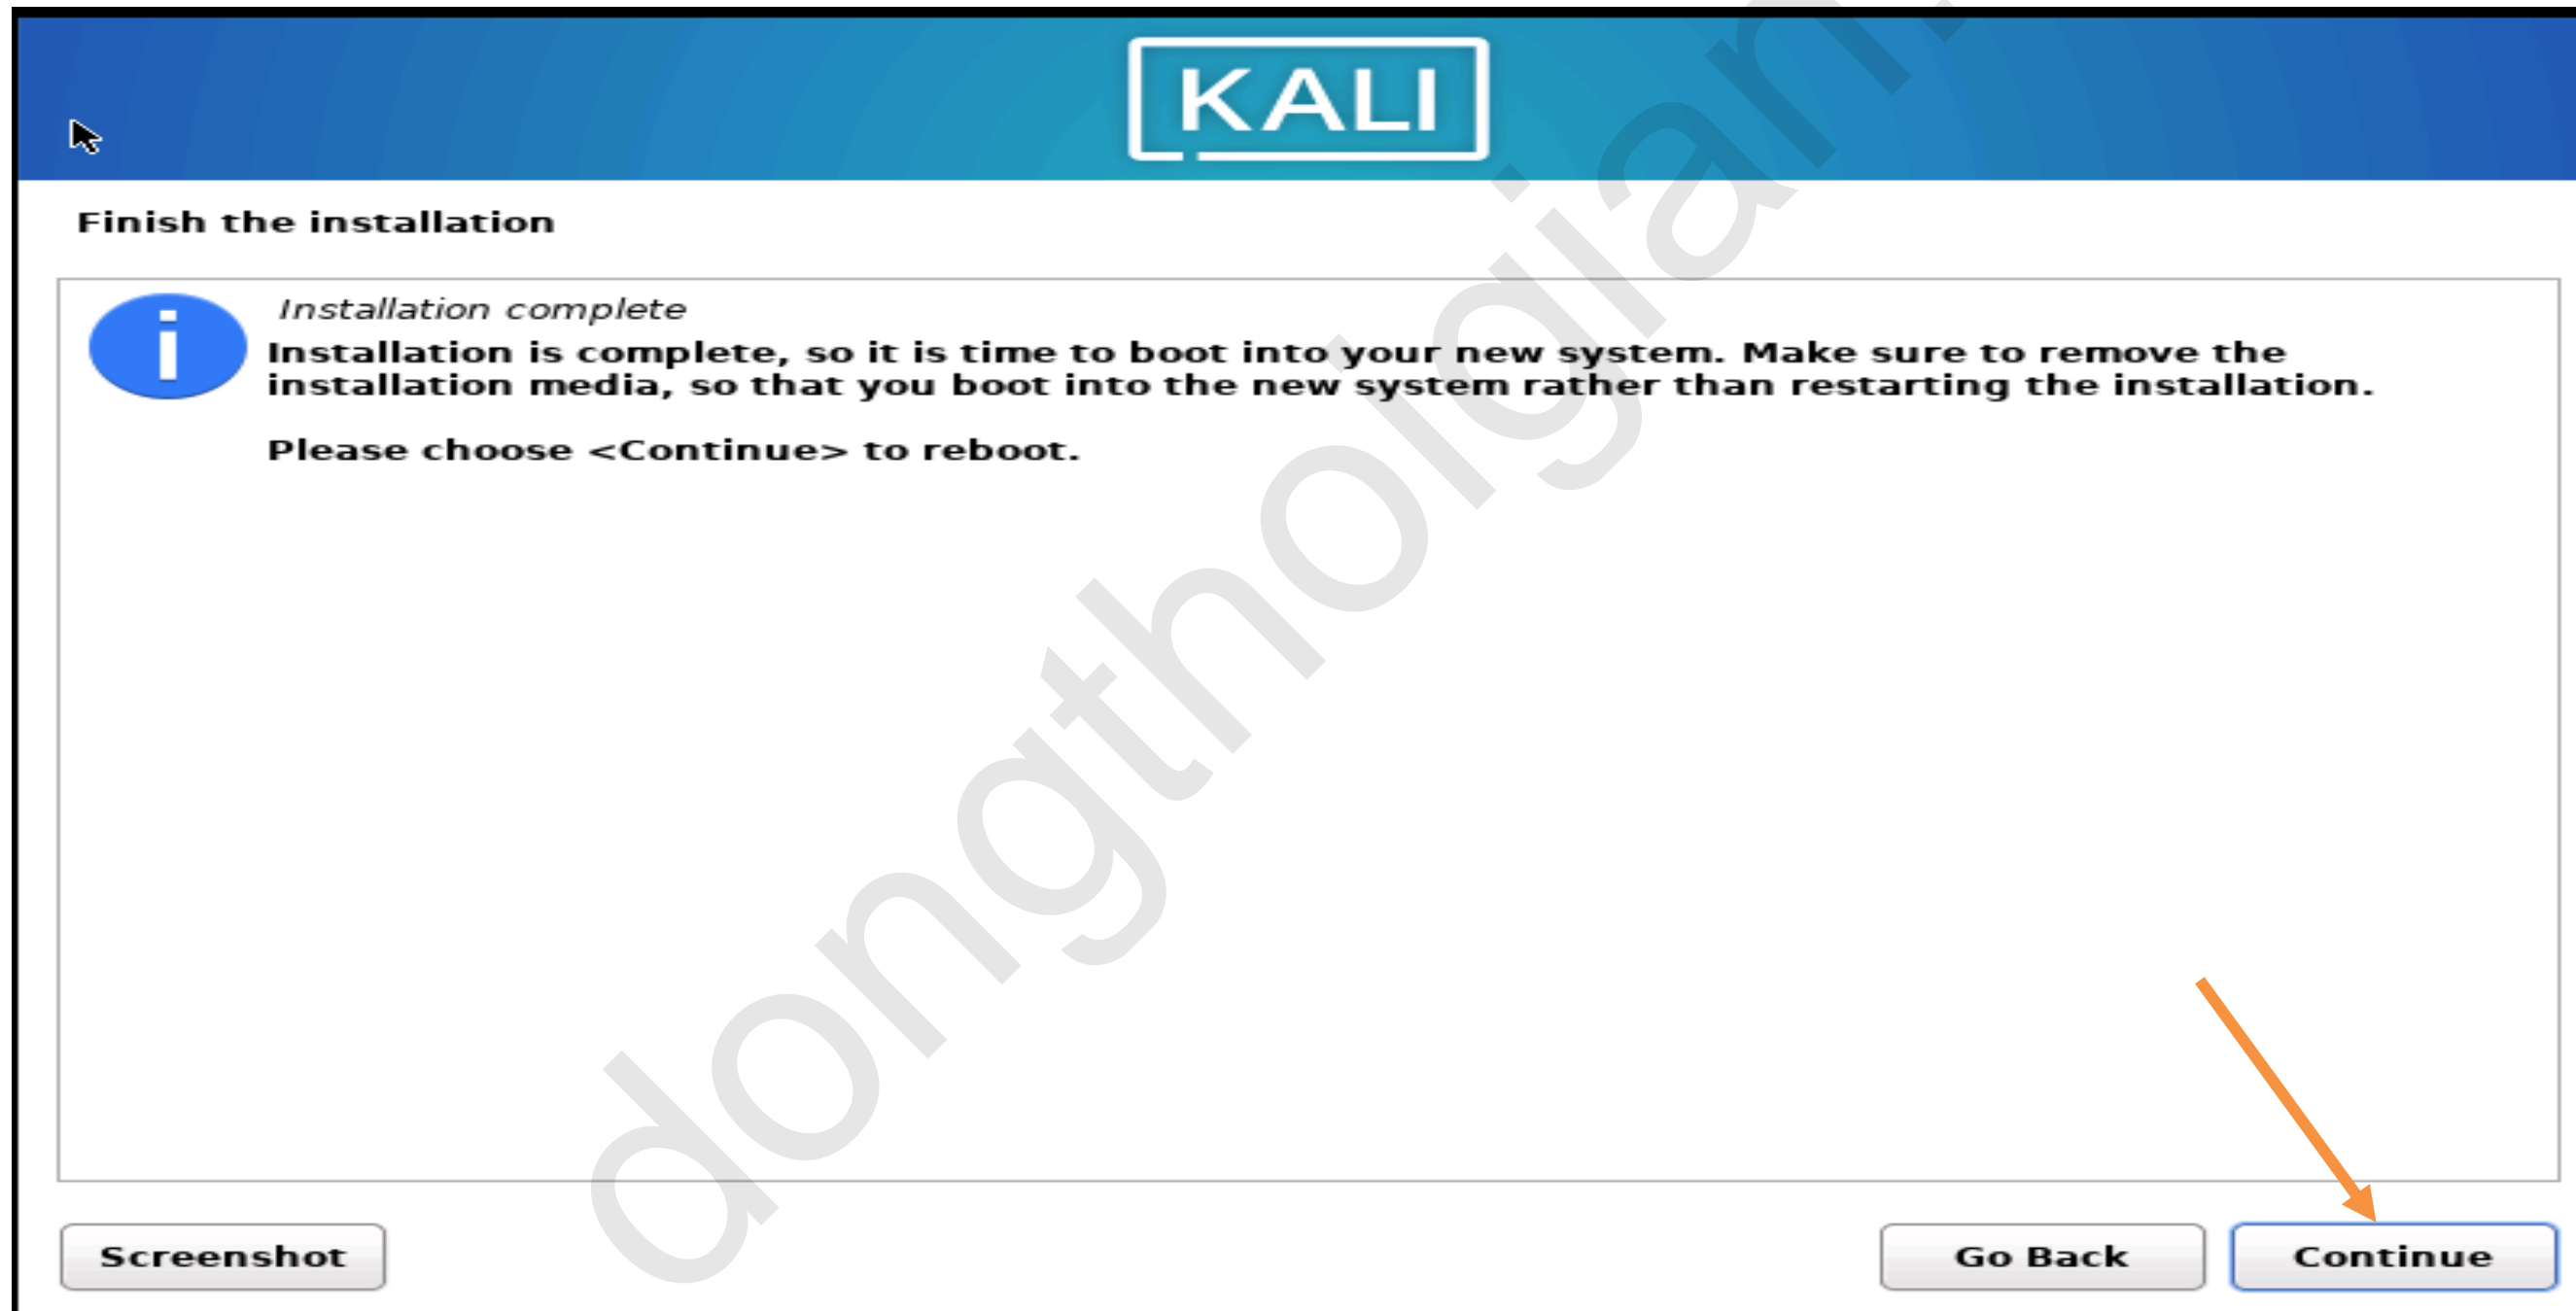

Device for boot loader installation: chọn phần vùng boot **/Dev/sda**

Sau đó click continue

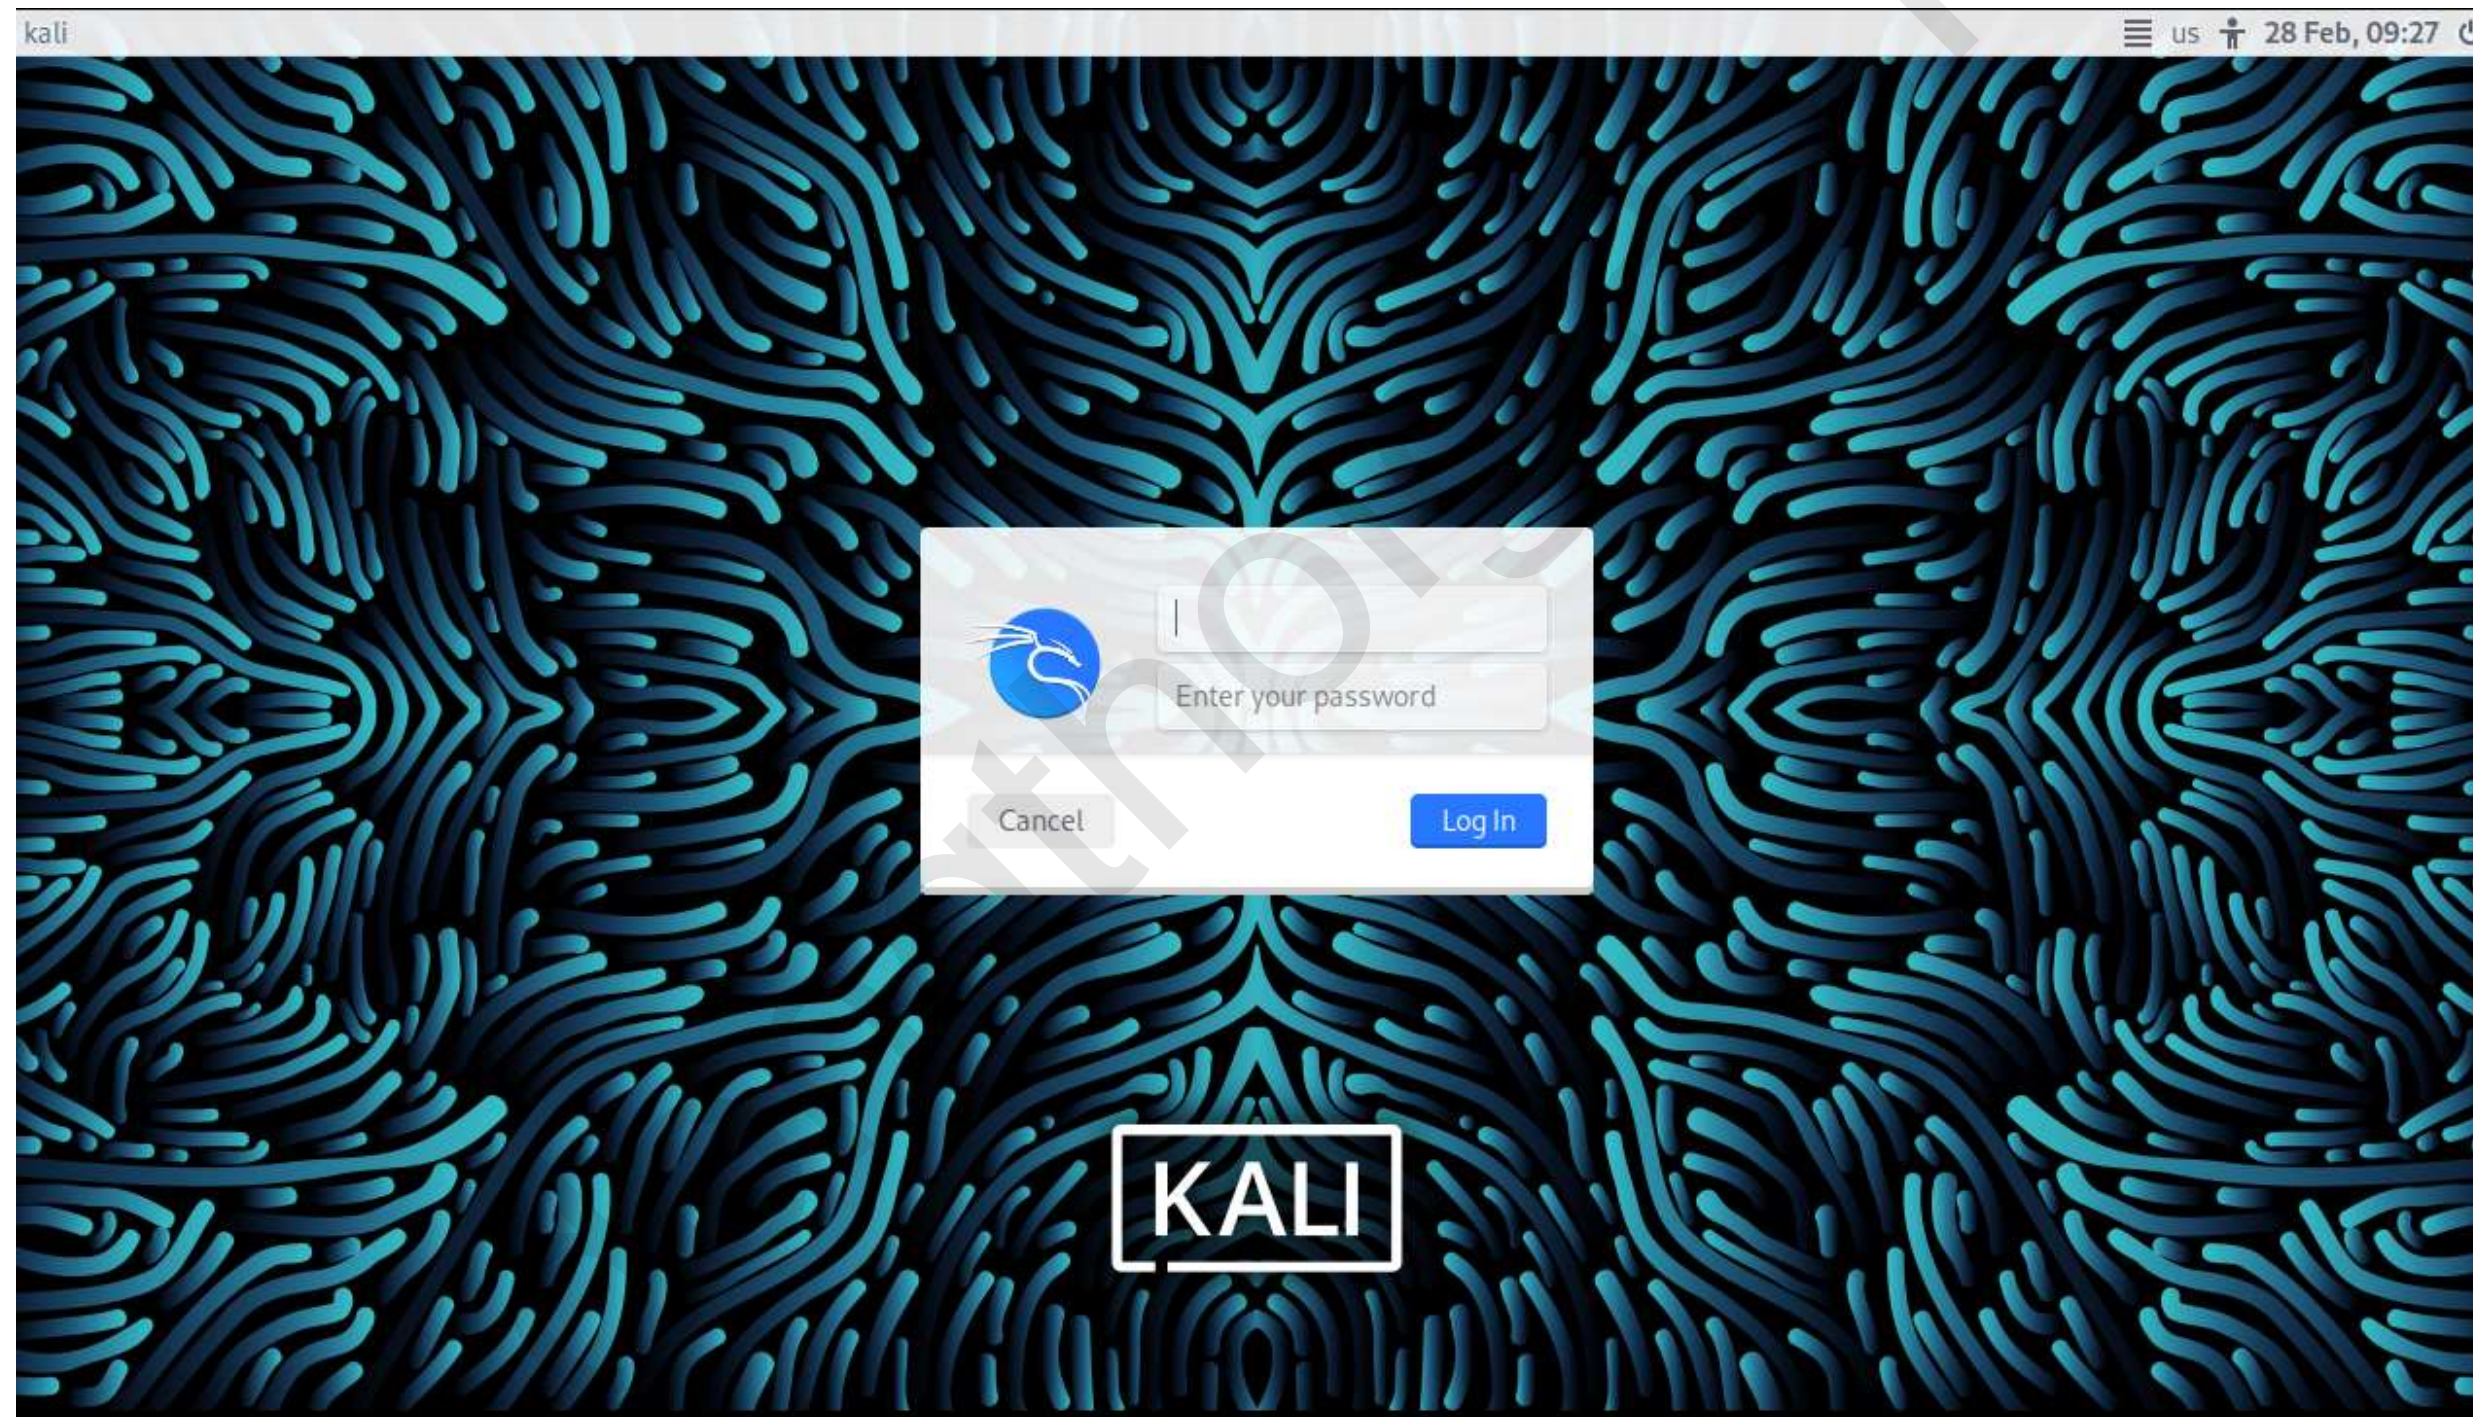

Step 33:

Tiến Trình cài đặt Kali linux đã hoàn tất
Click tab Continue

Step 34:

Đăng nhập vào tài khoản kali
User và password

Step 35:

Giao Diện Kali Linux
